Buried by Debris

Special thanks to all the work teams from other forests and partners that are helping with cleanup efforts to open Reds Meadow Valley in 2012.

Hotshot crew walks to work

Hazardous Work

Sawing one will make other logs roll

Stream restoration work will be needed

Flagging ribbon marks the trail location

Log stack blocks the trail

Traditional Handsaw Teamwork

Sawing team uncovers a trail…

Working deeper into the pile…

Until they punch through.

Chainsaws are used where allowed

Leaning trees are still hazards after the sawing is done

Trails are being uncovered, section by section

Trail work is needed once the sawing is done

Opening Reds Meadow is a BIG JOB!

Thank You, Hotshots from Shasta-Trinity National Forest
