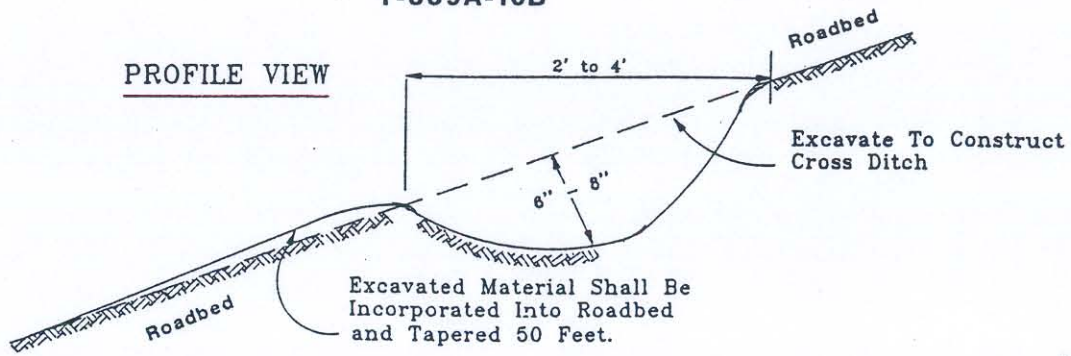
W = Waterbar/Cross Ditch Detail

T-839A-10B

PROFILE VIEW

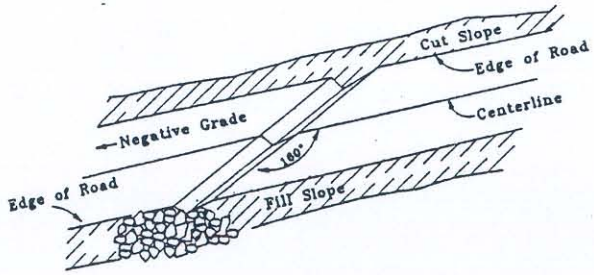


NOT TO SCALE

Treat Outlet as shown in

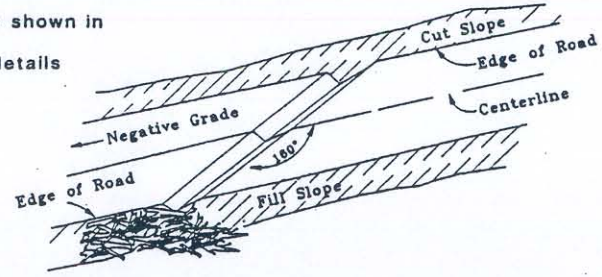
one of these details

#1



Fill slope shall be rocked to a 10' width, 1' depth, centered on the cross ditch outlet.

#2



Slash shall be placed on fill slope from cross ditch to toe of fill, to reduce soil erosion. Slash not over 4" in diameter and not more than 6' in length shall be placed as flat as possible on the fill slope. The width of the slash apron shall not be less than 15', centered on the outlet.
