3-14-2014

Sir:

I, Carole Genaro, am a long time member of Wind River Back Country Horse Man, which is a chapter of WY Back Country Horseman and B.C.H.A. nationally.

Members, namely Al Sammons and Dick Inberg, have been part of the process for the Shoshone Nat'l Forest revision plan for the past 10 or so years. They, as well as myself, have attended, commented on, and questioned forest planning sessions, although my name is probably not on record. Specifically, our public land committee members would be. I believe I have signed some attendance forms.

As I have personally spent a great deal of time horseback in the Dunoir Special Mgmt. area of the Shoshone Forest, it is imperative that I strongly object to wheeled activity being allowed in this area, which, in the past and possibly again in the future, could be considered for wilderness designation.

Opening this area to wheeled or motorized activity would counter act and preclude

3-14-2014

possiblity for future designation as well as encourage abuse.

Also, I believe the present allowance or of ignorance of wheeled activity in this special management area is in violation of the regulations for the area, and against the law.

The recent revelation of this new information also lends credability to my comments and allows for my filing of this formal objection.

Back Country Horse men has partnered with the Forest Service extensively over the years and we have willingly provided much "sweat equity" to contribute to safe and enjoyable experiences for all user groups.

My desire to keep the Dunor in as primitive a state as possible is of paramount importance to me. "Progress" and changes can occur else where.

Your careful attention to and consideration of this important issue before a final decision is reached would be most appreciated.

Please contact me to verify your

receipt of my objection or to request and procure further information from me.

Sincerely
Carole Genaro
