ELK RETRIEVAL is allowed under the following conditions:

When an elk has been legally taken, the individual who legally took the elk may drive or be driven to the downed elk. Under no circumstances may a second vehicle be used to retrieve the elk. The vehicle driven to the elk should be of sufficient capacity to minimize the number of trips necessary to retrieve the downed elk. The operators of the vehicle must take the most direct route to and from the nearest open route. Crossing of streams is not permitted if water is present. Crossing of wetlands is not permitted. The number of individuals who participate in the retrieval is limited only by the vehicle's capacity, and the willingness of others to walk to and from the downed animal. The vehicle used to retrieve the elk may be operated off the route up to the distance specified on the MVUM. If the downed game is further than the allowed distance, the vehicle may be driven only the specified distance from the designated route.
