- Exclusion Area
- Sale Area Boundary- A1, B1.1

• If whole tree yarding is used, limbs and/or tops shall be returned to the unit if 15% or more of the unit has exposed mineral soil; this material shall be distributed in areas primarily comprised of bare mineral soils to a height no greater than 2 feet.

• Slash piles and landings shall be located at least 200 feet (machine piles) from perennial streams, lakes, ponds, wetlands, or riparian areas.

• Retain a minimum of 10-15 tons per acre of large woody debris (≥ 3 inches in diameter).

• All landing slash shall be piled for later burning by the Forest Service. Piles shall be reasonably compact and free of soil to facilitate complete burning. Piles will not be less than 6 feet in height. Piles shall be of a size and location which will not impair road use or result in damage to residual timber. Piles shall be located at least 30 feet from residual timber.

• Purchaser shall fell all species over 3 feet in height not meeting minimum diameter specifications for included timber that are damaged beyond recovery by the Purchaser's Operations. These stems shall be bucked into lengths shorter than 3 feet.

• All logging slash within the unit will be lopped and scattered to a height of 2 feet or less.

Noxious weeds known to be throughout the sale area, B6.35.
