Sensitive Species Recommendation **(Please check 1 box below)**

x	R2 Sensitive Species (SS)		Not R2 SS, but should be considered for other Emphasis Species Lists
	Not R2 SS and Not of Concern Now		Insufficient Information Available to make a recommendation

Recommendation Rationale

This species is a CO endemic (G3S3). It is found in open sagebrush communities on moderate slopes, on federal, state, and private ownerships. Population sizes seem to have declined since the early 1980s. Development pressures are high in its habitat due to development in mountain ski towns. Threats include recent proposals for land exchanges and chemical spraying. Sensitive status is warranted.

Name/Title	Nancy Warren	Date	March 17, 2003
