Subject: Forest Order 01-16-05 – Sand Fire Area, Road & Trail Closure

From: Jeff Vail, Forest Supervisor 

I am issuing a Forest Order for public safety and resource protection to close the area that is burning as a result of the Sand Fire within the Angeles National Forest. The Sand Fire has been a fast growing fire and weather conditions are such that the fire has potential to continue to grow. In addition, there is limited road access to the area creating a potential for visitors to become trapped. Closure of the fire area is necessary to help ensure that no one is injured within the fire perimeter. The National Forest System roads and trails within the burned area will also be closed due to fire suppression activities that create a hazard to the public.

The Forest has had discussions regarding the closure with local Law Enforcement, Fire Departments, and cooperators. No opposition or issues were identified.

I have concluded that this decision may be categorically excluded from documentation in an Environmental Impact Statement (EIS) or Environmental Assessment (EA) under the National Environmental Policy Act. This action falls within the category identified in 36 CFR 220.6(d)(1) – prohibitions to provide short-term resource protection or to protect public health and safety – and does not require documentation in a decision memo, decision notice, or record of decision. I have determined that there are no extraordinary circumstances associated with this temporary closure. Implementation of the decision may begin immediately.
