

**Not R2 SS, But Should Be Considered for other**

**Emphasis Species Lists**

**Recommendations and Evaluations**

**Common Name:** Iowa Skipper

**Scientific Name:** *Atrytone arogos iowa*

**Recommendation:** **Not R2 SS, be should be considered for other Emphasis Species Lists**

**Recommendation Rationale:**

Species apparently is sufficiently abundant to assured persistence in the region. Concerns center around the strong association with native prairie with "Andropogon gerardii," and its susceptibility to fire. Suggest the grassland units consider this species for additional inventory or monitoring.
