

## **Not R2 Sensitive Species and Not of Concern**

### **Recommendations and Evaluations**

**Common Name:** Mottled Duskywing

**Scientific Name:** *Erynnis martialis*

**Recommendation:** Not R2 Sensitive Species and Not of Concern

### **Recommendation Rationale:**

Species is common and widespread in eastern U.S. and southern Canada. Occurs in patchy colonies in R2. Trends believed to be "stable" or slightly downward, but no real data. Habitat in R2 is foothills or low prairies with Ceanothus, which hosts caterpillars. Habitat destruction by development, invasion by non native plants, and loss to fire are major threats. Insufficient information, but no compelling evidence that sensitive status is warranted.
