

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: Sphinx Moth (Doll's Sphinx)

Scientific Name: *Sphinx dollii*

Recommendation: Not R2 Sensitive Species and Not of Concern

Recommendation Rationale:

Although located in arid habitats in northwest Colorado, species is believed to be stable outside R2. Dispersal capability is good - can colonize suitable habitat within short distances. Common where sampled in R2 with stable amounts of habitat in R2. Habitat vulnerability not believed to be a factor. Not of concern now.
