

Not R2 Sensitive Species and Not of Concern

Recommendations and Evaluations

Common Name: A Tiger Beetle

Scientific Name: *Amblycheila cylindriformis*

Recommendation: Not R2 Sensitive Species and Not of Concern

Recommendation Rationale:

In R2, evaluator indicates there are quite a few populations, some quite large, with no imminent threats. Habitat apparently is stable and resilient. It occurs on Comanche and Cimarron NGs, but it does not appear that NFS management threatens the species or its habitat. Association with bare ground suggests it is tolerant of grassland disturbance.
