2011 Aerial Detection Survey Sheridan Cody Bighorn NF Black Hills NF Shoshone NF Caribou-Targhee NF Jackson Bridger-Teton NF Casper Douglas Medicine Bow NF 2011 Aerial Detection Survey Mountain Pine Beetle Rawlins Spruce Beetle Douglas-fir Beetle Aspen Decline Other Insects & Disease Cheyenne Not Flown Medicine Bow NF National Forest or Grassland Boundary Major Road Due to the nature of aerial surveys, the data on this map will only provide rough estimates of location, intensity and the resulting trend information for agents detectable from the air. Many of the most destructive diseases are not represented on this map because these agents are not detectable from aerial surveys. The data presented 0 5 10 20 Miles on this map should only be used as a partial indicator of insect and disease activity, and should be validated on the ground for actual location and causal agent. Shaded areas show locations where tree mortality or defoliation were apparent from the air. Intensity of damage is variable and not all trees in shaded areas are dead or defoliated.
