Process for ordering U-Stream on an incident:

Complete a General Message Form for each type of service needed.

Order the U-Stream Service for a month for \$99 in support of live streaming.

If needing to stream for internal and external audiences, two separate accounts are needed, so that there are two urls (so that the external audience can't see the internal streaming).

Internal justification: provide access for those agency personnel who cannot get to the briefings, due to distance or other circumstances-safety issue. Net meeting won't work because there are other agency personnel other than FS personnel (state, other federal, county).

External justification: Provide access for external public who cannot get to the public meetings-reach a broader audience.

Internal login and password: login: pnw2 password: PNWteam2

Remember to close the account when leaving the fire, as it will continue to bill the credit card on file.

General message form goes to Finance-We already checked with computer support and they do not need to authorize it, as it is a service, not a program that is being installed on the computer.

Finance will send through to the buying team to purchase the service.

See attached example of login page for U-stream.
