

PROJECT SCOPING STATEMENT

Kara Community Pasture Pipeline Proposal
USDA, Forest Service
Douglas Ranger District
Medicine Bow/Routt National Forests
and Thunder Basin National Grasslands
Weston County, Wyoming

INTRODUCTION

The United States Forest Service and the Inyan Kara Grazing Association entered into a Cooperative Grazing Agreement on August 23, 2002. This agreement is for a period of ten (10) years, and permits the grazing of livestock owned by members of the grazing association in allotments and pastures on federal lands on the Thunder Basin National Grassland.

The Kara Community livestock grazing pasture area is located in the Kara Community Allotment northwest of Upton, WY. The legal description of the pasture is T48N, R66W taking in all or part of sections 5, 6, 7, 8, 9, and 17. The pasture includes 2,117 more or less total acres all of which are National Grasslands. The type of livestock permitted in the pasture is cow/calf pairs. Grazing occurs seasonally and annually.

PROPOSED ACTION

To construct approximately 1.5 miles of pipeline, install three livestock water tanks and one water storage tank in the Kara Community pasture on National Grassland administered jointly by the USFS and the Inyan Kara Grazing Association. This will be part of a larger pipeline project that will originate from a well on private land. The project will be done in three phases of which phase two and three will be on national grasslands. The proposed water improvement will be installed using vehicles for construction and hauling materials and will result in approximately one to two acres of disturbance.

PURPOSE AND NEED FOR ACTION

The Forest Service concurs that there is an existing *need* and that, with a change in the way domestic livestock grazing use is distributed in the allotment, the condition of vegetation can be improved to better reflect the desired conditions and goals described in the Thunder Basin National Grasslands Land and Resource Management Plan. Reservoirs are the only water sources in this pasture, however, due to the ongoing and prolonged drought these reservoirs are going dry and there is a *need* to establish a more reliable water source. Implementing the proposal to install the pipeline and tanks, can serve the *purpose* of better distributing grazing use and forage utilization, which may move riparian areas, woody draws and other key vegetation areas in the pasture toward the desired condition as described in the Grassland Plan.

Currently, a form of “rotational grazing” that defers use of the Kara Community pasture for part of the year is being employed.

AFFECTED ENVIRONMENT

The Kara Community pasture occurs in an area of gently rolling to fairly rugged hills and drainages. The vegetation type is typically a mix of sagebrush, and grassland. All federal lands in the pasture are permitted for livestock grazing and are also used by hunters, and other recreational users.

The Land and Resource Management Plan for the Thunder Basin National Grassland (2002) describes this area as being located in Management Area 6.1, which provides for rangeland with broad resource emphasis.

DECISIONS TO BE MADE

The decision to be made by the District Ranger is whether or not, and if so under what circumstances the proposed improvements would be constructed in the Kara Community pasture.

RELATIONSHIP TO OTHER LAWS AND DOCUMENTS

As a part of the effort to develop and describe the proposed action, the District Ranger and ID team reviewed and discussed all available information and data about the possible effects and or impacts that this action could have on the physical and biological environments in the analysis area, and the relationship between the proposal and laws, regulations, and agency policy that must be complied with if the proposal would be implemented.

Floodplains, wetlands, prime lands, threatened and endangered plant and animal species, global warming, minerals, cultural resources, consumers, civil rights, women, minority groups, and other environmental factors, and the possible beneficial effects and/or adverse impacts of this proposal on those resources will be considered.

The requirements of the Bankhead Jones Farm Tenant Act apply to this proposed project. The Bankhead Jones Farm Tenant Act of 1937 (7 USC 1010) provides that the Secretary of Agriculture is authorized and directed to develop a program of land conservation and utilization in order to correct maladjustments in land use, and thus assist in controlling soil erosion, conducting reforestation, preserving natural resources, protecting fish and wildlife, developing and protecting recreational facilities, mitigating floods, preventing impairment of dams and reservoirs, conserving surface and subsurface moisture, protecting the watersheds of navigable streams, and protecting the public land, health, safety, and welfare, but not to build industrial parks or establish private industrial or commercial enterprises.

Endangered Species Act of December 28, 1973 (87 Stat. 884) P.L. 93-205, as amended. A Biological Assessment/ Biological Evaluation document will be written for the project area and

mitigation measures put into place for any threatened or endangered plants or animals that are found in the project area.

National Historic Preservation Act of October 15, 1966 (80 Stat. 915) P.L. 89-665, as amended, & Archeological Resources Protection Act of October 31, 1979 (93 Stat. 721) P.L. 96-95, as amended . A Heritage resource inventory and report will be completed for the Federal lands in the project area.

Clean Water Act (Federal Water Pollution Control Act) of June 30, 1948, (62 Stat. II 55) P.L. 80-845, as amended by the Water Quality Act of 1987 (Act of February 4, 1987, P.L. 100-4) and other laws. This proposed project is not expected to violate any provisions of this act.

The proposed action is expected to comply with the standards, guidelines, and stipulations for grazing of livestock on NFS lands as described in the Thunder Basin National Grassland Land and Resource Management Plan of 2002.

PUBLIC COMMENTS REQUESTED

Scoping to identify issues and concerns is an important part of the environmental analysis process (40 CFR Part 1501.7). You are encouraged to take the time to consider the proposed improvements for the Kara Community pasture of the Kara Community Allotment that are described elsewhere in this scoping document and submit your comments on this proposal to the Douglas District Ranger. The formal public comment period about this proposed action will end 30 days from the day after the Legal Notice about the action and this period of opportunity to comment is published in the Casper Star Tribune. No other formal public comment period regarding this action or the environmental analysis that will occur is planned.

Written comments may be submitted to the District Ranger, Douglas Ranger District, 2250 E. Richards, Douglas, Wyoming 82633, Attention: Kurt Staton, Rangeland Management Specialist. Written comments must be postmarked by the Postal Service, e-mailed, faxed, or otherwise submitted by 11:59 p.m. on the 30th calendar day following publication of the Legal Notice of this proposed action. E-mail comments should be sent to: **comments-rocky-mountain-medicine-bow-routt-douglas-thunder-basin@fs.fed.us**. If comments are electronically mailed the sender should receive and automated electronic acknowledgement from the agency as confirmation of receipt. If the the sender does not receive such confirmation it is the senders responsibility to ensure timely receipt by other means. Comments may be hand delivered to the Douglas Ranger District office between the hours of 7:30 a.m. and 4:30 p.m. Monday through Friday.

During this 30 day public comment period only those persons who submit timely and substantive comments with supporting reasons that the Responsible Official should consider in reaching a decision will be accepted as appellants (36 CFR, Part 215.13). In order to secure appeal eligibilty, and individual or representative of an organization submitting comments must either sign the comments document or verify their identity upon request. For more multiple names or multiple organizations, a signature must be provided by the individual authorized to represent the organization, or by each individual that wishes to have appeal eligibilty. Individual members of an organization must submit there own substantive comments in order to meet the requirements

of appeal eligibility as an individual. Comments received on behalf of an organization shall be considered as those of the organization only.

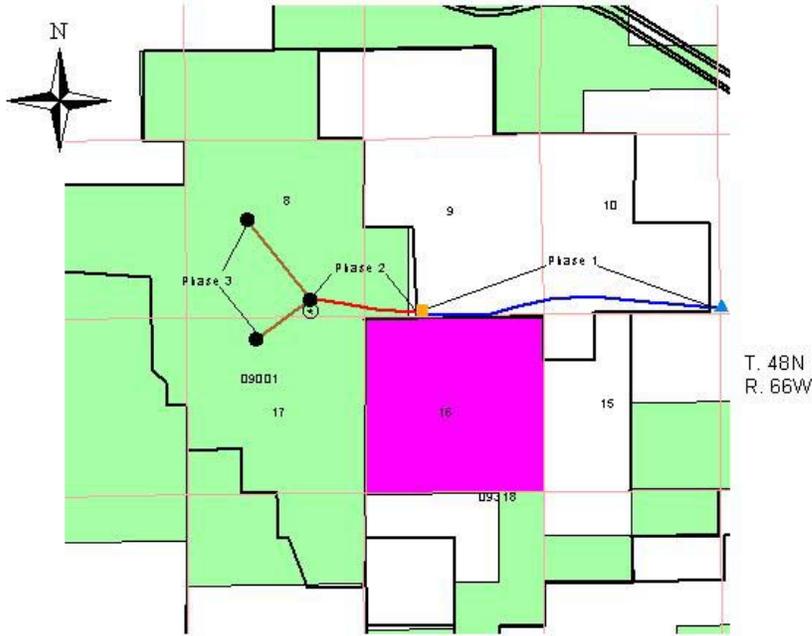

This letter and request for comments has also been mailed to other Federal, State, and local agencies, adjacent landowners, and individuals or organizations who may be interested in or affected by this project.

Comments received in response to this solicitation, including names and addresses of those who comment, will be considered part of the public record on this proposed action and will be available for public inspection. Pursuant to 7 CFR 1.27(d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that, under the FOIA, confidentiality may be granted in only very limited circumstances, such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within 10 days. For additional information, contact Kurt Staton, Rangeland Management Specialist, at (307) 358-4690.

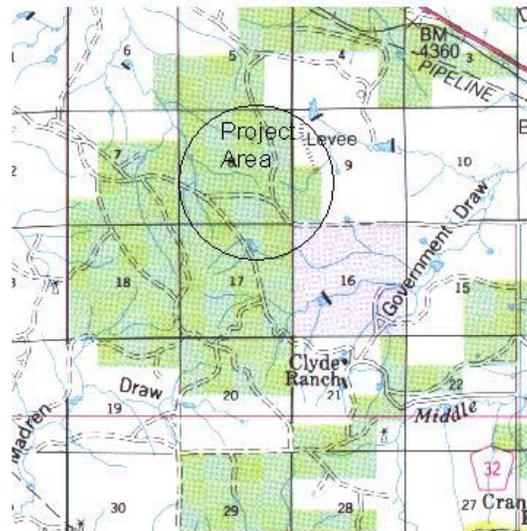

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, and marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audio tape, etc.) should contact the USDA's Target Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Ave. SW, Washington, DC 20250-9410 or call 202-720-5964 (voice or TDD). USDA is an equal opportunity provider and employer.
