

APPENDIX B: MAPS OF ALL ALTERNATIVES

This appendix contains maps that provide a visual representation of the four alternatives that were considered in detail.

Included are two sets of maps:

1. **North and South Maps** for the No Action, the Proposed Action/Alternative 1, and Alternative 2 display the location of threatened and endangered species habitat (Zoological Opportunity Areas and, if applicable, Management Prescription 6.3). These maps contain a table that identifies the approximate acres of these areas.
2. **MNF Forest Maps** for the No Action, the Proposed Action/Alternative 1, and Alternative 2 show the whole Forest on one page and depict the resulting forest-wide distribution of acres by MP and threatened and endangered species Zoological Opportunity Areas.

Note that for both sets, the Proposed Action and Alternative 1 are displayed on one map. This is because the locations and acreages of threatened and endangered species' habitat would be the same for both alternatives. The main difference between the alternatives is that a seasonal restriction for tree felling would be applied within MP 6.3 areas under the Proposed Action and such a restriction would not be applied under Alternative 1.
