

# How you can help...

Inyo National Forest permit holders can help the Forest Service prepare for the issuance of 350 new 20 year term permits by:

- ❏ Notifying the Recreation Residence Team if you have NOT received your compliance letter.
- ❏ Being patient as we work through the backlog of follow-up contacts.
- ❏ Making sure you have all of your compliance issues addressed by the due date in your letter. Please contact us if you need an extension.
- ❏ Notifying your Permit Administrator in writing when you have completed your corrections and are ready for final inspection.
- ❏ Not using dumpsters in Forest Service developed sites/areas (or other private property dumpsters) to dispose of your lot clean-up debris. It is illegal and you can be cited.
- ❏ Locating any rented dumpsters off of roads and not restricting emergency vehicle access. All dumpsters must be removed before snowfall.
