Expedition

Lemhi County, Idaho

Upper Village II

Mile120.2, State Highway 28, Look North

12 August 20, Clark and the Reconnaisance Party reached this village. Sergeant Gass, an expedition member, chronicles, "We ... travelled ... to a village of the Indians on the bank...At this place there are about 25 lodges made of willow bushes. They are the poorest and most miserable nation I ever beheld; having scarcely anything to subsist on, except berries and a few fish...They have a great many fine horses, and nothing more; and on account of these (the horses) they are much harassed by other nations." Gass continues, "Here we procured a guide, (Old Toby) and left our interpreters to go on with the natives, and assist Captain Lewis and his party to bring on the baggage..."

Famed Interpreter

Mile 122.5, State Highway 28

15 Sacajawea returned to her homeland in the Lemhi Valley in 1805 as a member of the Lewis and Clark party. She was reunited with her family after being abducted by an Assiniboine war party and served as

liason between her people and the expedition.

Retrace the Lewis & Clark Expedition Through Lemhi County

August 12 to September 3, 1805

ppointed by President Thomas Jefferson, Captains Meriwether Lewis and William Clark were charged with finding a navigable water route to the Pacific Coast. Departing Wood River, Illinois in May 1804, the expedition traveled for fifteen months to reach the headwaters of the Missouri River, then crossed the Continental Divide and entered the Lemhi Valley on August 12, 1805.

The Corps of Discovery faced many perils in this region. Stricken by limited provisions with winter fast approaching, the party transported mountains of canvas, wood and iron gear. After paddling the length of the Missouri River, the treacherous current of the Salmon River and the steep, crumbly surrounding mountains proved to be formidable obstacles.

Lewis with three men led an Advance Party over Lemhi Pass and encountered the Lemhi Shoshoni Nation. Convincing the Shoshoni that the small party posed no threat to their well being, they agreed to accompany Lewis' party back over the pass and to assist

Clark led the **Reconnaissance Party** into the valley to explore the feasibility of navigating the Salmon River. Faced with the strong possibility of drowning should their flimsy canoes be swept into the rocks by the swift current, the party made a critical decision changing the course of the expedition and opted for a somewhat less hazardous, but equally difficult dry-land route.

Encamped in Montana, Lewis sorted supplies necessary for the **Portage Party**, then joined Clark's party. Winter now only weeks away, the Entire Expedition grew anxious to get to the Pacific Coast.

Imagine the hardships faced by these explorers as they trekked through the Lemhi and Salmon River Valleys, and uncover places where you can retrace Lewis and Clarks steps in areas where little has changed since they were here.

Withington Creek Camp

MP 125.9, State Highway 28

16 Clark with an Indian guide crossed over the Lemhi River and camped at Withington Creek. Sergeant Gass recalls "... Captain Clarke ... proceeded ... about 8 miles and encamped on a fine spring, five of the Indians came and stayed with us during the night.'

Fish Weir Village

Mile 131.4, State Highway 28

17 Site of a fish weir across the Lemhi River where the Shoshoni were able to trap enough Salmon for their subsistence and provide the expedition with as much broiled and dried salmon as they could eat, as well as dried chokecherries.

Clark stopped here the 21st. and writes, "...

Those Indians are mild in their disposition appear Sincere in their friendship, puntial, and decided kind with what they have, to Spare ... The women are held more Sacred...and appear to have an equal Shere in all Conversation, ...their boeys & Girls are also admited to Speak except in Councils, the women doe all the drugery except fishing and takeing care of the horses,

"... I went to see the place those people take the fish, a wear (weir) across the creek in which there is stuk baskets set in different derections so as to take the fish either descending or assending..."

Forks of Louis's River

Mile 306.0, US Highway 93

18 Later at Tower Bluffs Clark reflects, "...I shall in justice to Capt. Lewis who was the first white man ever on this fork of the Columbia Call this Louis's river." How do you spell Lewis? Clark apparently forgets. His description continues, "... The Westerley fork of the Columbia River (the Salmon River) is double the Size of the Easterley fork (Lemhi River) & below those forks the river is ...100 yards wide, it is verry rapid & Sholey water Clear but little timber." Clark goes on, "the forks of this river is famous as a gig fishery and is much resorted by the Natives."

Sammon Creek

Mile 309.9, US Highway 93

Clark in his August 21, 1805 journal entry describes Sammon Creek (now known as Carmen Creek), "...Passed a large Creek which fall in on the right Side 6

> this Creek & to the Missouri.' Sergeant Gass adds, "In this branch we shot a salmon about 6 pounds weight.

"We proceeded down the river through dreadful narrows, (starts about 1 1/2 miles upstream from this point) where the rocks were in some places breast high, and no path or trail of any kind..."

Sore Horse Feet Camp

Mile 6.0, Forest Road 30

28 Clark writes in his journal, "... I deturmined to delay the party here with my guide and three men proceed on down to examine if the river continued bad or was practiable..." Sergeant Gass writes August 24, 1805, '...The river at this place is so confined by the mountain, that it is not more than 20 yards wide, and very rapid. The mountains on the side are not less than 1000 feet high and very steep. There are a few pines growing on them. We caught some small fish to-day, and our hunters killed 5 prairie fowls. These were all we had to subsist on. At 1 o'clock Captain Clarke and his party returned after having been down the river about 12 miles..."

Lewis recalls Clark's journey, "... at the distance of four miles he arrived at the river and the rocks were here so steep and juted into the river such manner that there was no other alternative but passing through the

river, this he attempted with success tho'water was so deep for a short distance as to swim the horses and was very rapid; he continued his rout one mile along the edge of the river under this steep Clift to a little bottom..."

> As the canyon narrowed, so did their options. Along with their horses, they were forced into the water here by the shear rock walls.

Clark writes in his journal, "... The River from the place I left my party to this Creek is almost one continued rapid...the passage of either with Canoes is entirely impossable, as the water is

Confined between hugh Rocks & the Current beeting from one against another...at one of those rapids the mountains Close So Clost as to prevent a possibility of a portage with great labour ...the others may be passed by takeing every thing over Slipery rocks, and the Smaller ones Passed by letting down the Canoes empty with Cords, as running them would certainly be productive of the loss of Some Canoes..." While returning to camp, Captain Clark fell from a rock and injured one of his legs.

Berry Creek

Mile 10.8, Forest Road 30

30 Lewis' journal reflects Clark's journey; August 23, 1805, "...a plain indian road led up this (Indian) creek which the guide informed him (Clark) led to a large river that ran to the North, and was frequented by another nation who occasionally visited this river for the purpose of taking fish...Cap. C...caught some small fish, on which, with the addition of some berries, they dined...after dinner Capt. *C. continued his rout down the river and at 1/2* a mile pased another creek (Squaw Creek)... leaving the creek on the wright he passed over a ridge, and at the distance of a mile arrived at the river where it passes through a well timbered bottom of about eighty acres of land..."

> Fruit of the chokecherry Prunus virginiana, a staple food for the Shoshoni.

Final Observation of the River Canyon

Vista from the Lewis and Clark Trail, looking down Trail Gulch.

Lewis and Clark-Last Ascent

Mile 345.5, US Highway 93

34 Seeking a route through Idaho's mountain barrier, the Entire Expedition left the canyon and climbed a high ridge reaching the Bitterroot Valley on September 4. Without a trail, Toby, their Shoshoni guide, led them along a difficult ridgetop divide over high peaks, which are visible to the north.

Lost Trail Pass

Mile 351.1, US Highway 93

35 The Lewis and Clark expedition likely lost the trail to this pass. They camped two miles west of here the night of September 3.

From here, the Lewis and Clark Expedition proceeded down the Bitterroot River Valley, back into Idaho and finally down the Columbia River. They reached the Pacific Ocean November, 1805.

> Red Monkeyflower Mimulus lewisii named for Captain Lewis.

... Forever Changed

Findings from the Lewis and Clark Expedition were instrumental to westward expansion. Adventurers and scientists, Lewis and Clark recorded detail descriptions of the plant, animal, geographic, and cultural elements of their trip.

Hoping to find a navigable route down the Salmon River, Clark was forced to retrace his steps opting for a safer, land-based route after viewing the "River of No Return." Although not "entirely impassable", the Salmon River, to this day, provides adventure to modern-

Salmon River Reconnaisance Sign

Mile 326.2, US Highway 93

25 Hoping for a navigable route to the Pacific, Clark explored the first few miles of the rugged Salmon River Canyon below here (North Fork) late in August. His small advance party camped near this location.

Fish Creek Village

Mile 326.4, US Highway 93

26 Fish Creek, now known as the North Fork of the Salmon River, was the site of an Shoshoni village which is described by Clark in his journal for August 22, 1805. "...Several families of Indians were encamped and had Several Scaffolds of fish & buries drying we allarmed them verry much as they knew nothing of a white man being in their Countrey, and at the time we approached their lodges which was in a thick place of bushes – my guiedes were behind.— They offered every thing they possessed (which was verry littl) to us, Some run off and hid in the bushes...I gave a fiew Small articles to those fritened people which added verry much to their pasifi-
