

**Hoosier National Forest**  
**Administrative Correction 5**  
September 2007

**Corrections to Management Areas**  
**Updates Forest Plan Maps 1A, 1B, 1C, and 1D**

Administrative corrections are defined at 36 CFR 219.31 and may be made at any time and are not plan amendments or revisions, and do not require public notice of the preparation of an environmental document under Forest Service NEPA procedures.

Administrative corrections include the following:

- (1) Corrections and updates of data and maps;
- (2) Updates to activity lists and schedules required by 36 CFR 219.30 (d)(1)-(6);
- (3) Corrections of typographical errors or other non-substantive changes; and
- (4) Changes in the monitoring methods other than those required in a monitoring strategy (36 CFR 219.11 (c)).

Administrative Corrections should be printed on salmon colored paper and distributed to all employees for inclusion in their copy of the Forest Plan.

Forest Plan Administrative Correction 2 incorporated approximately 252 acres of National Forest System land onto maps. These acres were not additional acres. Administrative Correction 2 incorrectly listed the areas on Map 1B and 1C. Additionally approximately 78 acres of NFS land that was included in Management Area 7.1 is better suited for Management Area 2.8, based on the current condition. Maps have been updated and are to be incorporated into the Forest Plan.

Note: Administrative Correction 5 fully replaces Administrative Correction 2, including Maps 1A, 1B, 1C, and 1D.
