

2010 Annual Operating Instructions (AOI)

Allotment: SU

Permittee: Glyn Griffin

Permit Number: 61296

Authorization:

Authorized to graze the following in 2010:

Authorized	From	To	Allotment
55 cow/calf	3/1/10	2/28/11	SU

Management:

SU 2010 Pasture Rotation:

Pasture	Time Frame
Winter	3/01-4/30 (all cattle)
SU	5/1-7/31 (all cattle)
Dozed	8/1-10/15 (all cattle)
Winter	10/16-2/28 (all cattle)
Home	Rest

Please notify us of cattle movements onto and off of the allotment, as well as refinements that may be needed to enhance the management system. If you identify the need to differ from this management system by more than 15 days, please contact this office at least two weeks in advance so the District has time to conduct monitoring and assess your request.

Utilization Standards and Monitoring:

In accordance with the SU Allotment Decision Memo dated 3/12/2007, the allowable use level set for the SU Allotment will be conservative use (**30-40%**). Use of riparian browse is not to exceed **30%** of riparian sprouts/seedlings heavily hedged. Monitoring will be conducted within two weeks before or after livestock leave a scheduled pasture. If utilization levels within portions of a scheduled pasture approach allowable use, you are required to move livestock into areas not approaching allowable use. If cattle cannot be effectively

managed away from areas within the pasture that have met allowable use or if utilization objectives are met throughout the pasture prior to scheduled rotation, contact District Personnel. Cattle will be moved into the next available pasture within the annual rotation. In the event that forage utilization objectives are met in all available pastures, livestock will be removed from the allotment. Management adjustments will be made to the following years Annual Operating Instructions to avoid recurring situations. The following dates have been tentatively scheduled for monitoring on the allotment. You are highly encouraged and invited to participate in monitoring with District personnel and/or on your own.

Allotment	Pasture	Monitoring date
SU	Winter	5/07/2010
SU	SU	08/04/2010
SU	Dozed/Winter	10/19/2010

Forage Growth and Water Availability:

Per Part 2, clause 8(c) of your Term Grazing Permit, if forage growth and water availability are not adequate during all or portions of the 2010 grazing season, total or partial livestock removal from the allotment may be necessary.

Salt and Supplement Policy

Supplemental feeding of livestock is allowed (to strategically manage livestock distribution and forage use) as follows:

- a) Place supplements on previously disturbed areas (i.e., borrow pits) or natural bedrock outcrops when possible (supplement sites).
- b) Locate supplement sites 0.25 mile or more from waters and key areas except where prior written permission has been obtained from District Ranger.
- c) Locate supplement sites where forage is abundant and utilized less than average.
- d) Limit supplement types to non energy feeds such as salt, protein and mineral blocks.
- e) Use products that prevent the spread of noxious weeds, no feeding of hay on National Forest System Lands.

Range Improvements:

All assigned range developments identified in your Term Grazing Permit must be maintained to a functional status.

Advance planning is needed for any range improvement reconstruction or replacement, including fences and water systems to evaluate the need for any additional surveys. General maintenance/repair is excluded. Advance planning is also needed for authorized stock tank cleaning so surveys can be scheduled accordingly. Please contact the District in advance if you are proposing any of this type of work.

Please protect natural springs and areas with riparian type vegetation. Drainage bottoms, creeks, springs, and cienegas, where water is available, are most susceptible to livestock concentrations.

The following range improvements were discussed and planned for this grazing season:

Fences:

1. Allotment Boundary Fence #006101 (0.75 miles) needs replaced and put on line with forest boundary. Will initiate land survey and necessary biological and heritage surveys prior to implementation possibly in grazing year 2011.

Water Sources:

2. SU 2 Tank #006102 needs to be cleaned and will be evaluated in 2010.
3. SU Tank #006095 needs to be cleaned and will be evaluated in 2010.
4. Wee Tank #006324 needs to be cleaned and will be evaluated in 2010.

The SU Annual Operating Instructions (AOI) are a part of the Term Grazing Permit as provided for in Part 3, Section 8. The AOI complies with the standards and guidelines found in the 3/12/2007 SU Allotment Decision Memo, the 4/02/2007 Allotment Management Plan and in the Gila National Forest Plan. It also complies with the Endangered Species Act on-going grazing consultation for the SU allotment. Any additional information collected during the year may be incorporated into the annual operating instructions.

Feel free to contact Aaron Baldrige or myself at (575) 533-6231 if you have any questions concerning this document.
