

67.5 - Exhibit 01  
FNF Land Classification

Classification	Acres
1. Non-Forest land (includes water)	222,998
2. Forest land	2,139,700
3. Forest land withdrawn from timber production	978,246
4. Forest land not capable of producing crops of industrial wood	11,643
5. Forest land physically unsuitable: --irreversible damage likely to occur. --not restockable within 5 years.	168,649
6. Forest land--inadequate information 1/	50,312
7. Tentatively suitable forest land (item 2 minus items 3, 4, 5, and 6)	930,850
8. Forest land not appropriate for timber production	
9. Unsuitable forest land (items 3, 4, 5, 6, and 8)	
10. Total suitable forest land (item 2 minus item 9)	
11. Total national forest land (items 1 and 2)	2,362,698

1/ Lands for which current information is inadequate to project responses to timber management. Usually applies to low site lands.

The Forest Service uses the most current and complete data available. GIS data and product accuracy may vary. They may be developed from sources of different accuracy, accurate only at certain scales, based on modeling or interpretation, incomplete while being created or revised, etc. Using GIS products for purposes other than those for which they were created may yield inaccurate or misleading results. The Forest Service reserves the right to add, correct, update, modify, or replace GIS products without notification. For additional information contact:
