APPENDIX G

ACTIVITY SCHEDULE

INTRODUCTION

This appendix displays activity schedules for fish, wildlife, recreation, trails and roads at the Oregon Dunes NRA under the alternatives being considered in the FEIS (see Figure II-13 in Fish, Chapter II and the Wildlife Section in Chapter II for lists of habitat enhancement projects). The schedules summarize projects planned over the life of the plan. These projects are additional to the current on-the-ground situation. Alternative C, the current plan, shows some additional activity since it is not yet fully implemented.

Projects shown will be reviewed annually and may be revised if management direction, priorities or resource conditions change. Site-specific environmental analyses will be prepared to assess the environmental impacts of specific projects prior to implementation.
