

APPENDIX F

Allowed Uses on Roads and Trails for Modified B and the Other Alternatives

The following table displays the uses that will be allowed on the native surface roads or trails that will be open to public wheeled motor vehicle use under Modified B. In addition to the roads and trails listed in this table, there are 680 miles of surfaced NFS roads that will be open to highway legal vehicle use and an additional 331 miles of State and County roads open for public wheeled motor vehicle use within the Eldorado National Forest¹. The table below displays the existing maintenance level (ML) for each of the existing NFS roads for informational purposes. Following the final decision, any ML-1 roads to be open to public wheeled motor vehicle use as a road will be changed to ML-2. Some ML-1 roads will become motorized trails. Unauthorized routes that are listed will be added to the National Forest transportation system and will be assigned as ML 2 since they will be managed as a road open to public wheeled motor vehicle use.

Similar tables for each of the other alternatives are included on the CD that is a part of this FEIS. These other tables are included on the CD because of the size of the tables and in an effort to reduce the overall size of the FEIS.
