Fuelwood Information

To cut your own firewood on the Eldorado National Forest, you will need to purchase a Fuelwood permit. You will usually have to search out wood locations yourself.

- ◆ The permit is issued from any of the District offices and is **valid from April 1 to December 31**. Permits can be purchased as of April 1st.
- ◆ The permit allows you to search for and gather **dead and down** wood on almost all Eldorado National Forest land outside of wilderness areas and administrative sites. The permit is only valid on this forest.
- ◆ **Standing dead trees less than 10 inches** (no larger) in diameter at eye level can be cut. Please note that many broadleaf trees lose their leaves in the fall and winter. Do not mistake them for dead.
- ◆ The **fee** is \$15.00 per cord with a two-cord minimum and an eight-cord maximum per household per year. You may purchase your permit with a personal check, cashier's check, money order, or cash.
- ◆ The permit is non-transferable and non-refundable.
- ◆ The permit does not authorize camping or any other activity.

Obtaining A Permit

You may obtain a permit in person at any of the Ranger District Offices. To obtain a permit by mail download the application form from www.fs.fed.us/r5/eldorado/passes/fuelwood and mail.

You will be issued four items: They are all considered to be part of your permit.

- 1) The permit.
- 2) Firewood Conditions attachment which has the Product Quantity Removal Record. **You are required to** write the load ticket numbers on the record form along with the date, time, number of cords and your signature before you move any wood, even if you have not finished a complete load.
- 3) Motor Vehicle Use Map.

Road Travel and Woodcutting

Vehicle use on roads is allowed only on the routes shown on the Motor Vehicle Use Map issued with your permit. Parking along roads designated or authorized for public travel is permitted within one vehicle length from the edge of the road surface.

Periodically throughout the woodcutting season the Eldorado National Forest may identify concentrations of fuelwood not accessible from the roads designated on your Motor Vehicle Use Map. In order to facilitate the removal of fuelwood from these identified areas, Ranger Districts may establish Fuelwood Cutting Areas. As these areas are established, routes will be signed and maps can be obtained from Ranger District Offices or from the Eldorado National Forest website. Contact the Ranger District offices or visit our web site for information about current fuelwood cutting areas.

During the wet season, some roads may be too wet to travel on without causing resource damage. The Eldorado National Forest will implement road closure orders during these periods. These closure orders will supersede any road use authorized by your permit.

Be sure to call (530) 644-6048 or refer to the Eldorado National Forest Web Site _____ for latest road closure status prior to driving on any non-paved road.

- 4) Transportation (load) tickets appropriate for the number of cords you purchase. Each ticket is meant for transporting 1/4 of a cord of wood, or less. Please do not lose the tickets, as they will not be replaced. If you are unable to use them before December 31, they will no longer be useable. A different color will be used for the next year. Punch hole for month and day and attach to load.

Note: If more than one vehicle will be hauling wood at a time, be sure that one party has the permit and that all loads have completed tickets attached. The vehicles shall stay together during travel since the load, tickets, and permit may be inspected.

What Is A Cord Of Wood?

A cord of wood is a well-stacked pile of wood which measures 4x4x8 feet. Multiplying Length X Height X Depth of the pile gives 128 cubic feet. Your transportation tags are valued at 1/4 of a cord, which is 32 cubic feet. When your wood is loaded, multiply to find out how many cubic feet you are carrying, and attach the correct number of tags. If you are over 1/4 cord (or multiple), but under the next 1/4, you must add the extra tag.

Where May I Cut?

You must be on Eldorado National Forest land. It is your responsibility to determine where you are cutting. Always be alert for property boundary signs.

Do Not Cut In:

- ♦ Areas signed NO WOODCUTTING.
- ♦ Areas designated closed; such as, wilderness areas and administrative sites.
- ♦ Campgrounds or within 150 yards of campgrounds, developed recreations sites or buildings.
- ♦ Active Timber sales (look for signs).
- ♦ Private or other non-National Forest lands.
- ♦ Designated Sensitive areas.
- ♦ Some areas may be closed under emergency conditions in order to minimize conflicts with other uses or to reduce resource damage.

This is a K-tag or location poster that can be found in the forest. A nail or tack stuck in a yellow location poster shows your location in the forest. Forest Service maps are marked with the corresponding legal subdivisions.

In this example: T11N, R15E, Section 1.

Equipment Requirements & Safety

A chainsaw inspection is not necessary to obtain a woodcutting permit. It is your responsibility to make sure your saw has a properly operating spark arrestor system as required by state law. A working fire extinguisher or shovel are required while woodcutting.

A first-aid kit, gloves, and safety glasses are recommended for a safe outing. In addition to a chainsaw, maul, splitting wedges, and cable or chain, a well-equipped tool box is recommended.
