Campfire Permits

When you camp in developed campgrounds, no campfire permit is required. If you plan to stay **outside maintained campgrounds, you may want a campfire for cooking**, enjoying its warmth, or roasting marshmallows.

For campfires, stoves, lanterns or barbeques used outside a recreation vehicle, you need a campfire permit.

It is free, valid for a full year from Jan. 1 to Dec. 31, and may be obtained in person from Forest Service, Bureau of Land Management, or California Department of Forestry and Fire Protection offices.

Be aware that as fire danger becomes greater, campfires may be prohibited. Please check to find out if there are any fire restrictions in the area where you intend to camp.

Dispersed “Pick Your Own Spot” Camping

Most of the land in the National Forest is open to camping free of charge which is referred to as “dispersed” camping. Visitors can camp just about anywhere in the national forest, unless specifically prohibited*. Maps and staff are available at most Forest Service offices to assist visitors in finding a suitable spot.

Large groups can have a significant impact to an area. Try to camp in hardened areas and always keep vehicles on roads and trails. Do not leave trash or toilet paper behind.

Not being in a campground means that there will not be certain conveniences.

- ◆ **No piped water:** It is best to bring your own water. Lake, stream or spring water may be contaminated.
- ◆ **Human Waste:** Proper disposal of human waste is important. Leaving human waste in dispersed camping areas can spread disease, lead to contaminated water supplies, contaminate soils, attract wildlife, and spoil a camping area. Portable eco-friendly human waste disposal systems which allow you to safely "Pack It Out" are commercially available and recommended. As a last resort, choose a spot at least 200' away from water sources and campsites, dig a small hole at least six inches deep, and cover it when you are through. Seal your toilet paper in a bag, pack it out, and dispose of it properly.
- ◆ **No trash service** - Pack It In, Pack It Out
- ◆ **Stay limit** - 14 days per district annually

***No dispersed camping is allowed around the following lakes** because of heavy visitor use and the presence of summer homes:

- ◆ Echo Lake
- ◆ Caples Lake
- ◆ Gerle Creek Reservoir
- ◆ Ice House Reservoir
- ◆ Kirkwood Lake
- ◆ Silver Lake
- ◆ Stumpy Meadows Reservoir
- ◆ Woods Lake

Water Quality

Water quality testing is not performed on open water sources such as lakes, streams and springs. Boil or treat before using.

Bear Country

In most cases, bears are not a threat, but they do deserve your respect and attention. When camping and hiking in bear country keep alert and enjoy the opportunity to see these magnificent animals in their natural habitat.

Keep Your Camp Clean

Keep clothing, tables, grills, and camp stoves free of grease. Pick up and properly dispose of all food debris, bones, or garbage in the vicinity. Keep your tent and sleeping bag free of food smells. Do not keep in your tent the clothes you cooked in.

Store Your Food Properly

Seal all food in airtight containers. Store all food, related supplies, and ice chests in your car trunk, pickup cab, camper shell, or suspended at least 10 feet off the ground and 4 feet away from the tree trunk. Bear resistant containers can be purchased from outdoor stores. Bears recognize ice chests, cans, and backpacks, so store them as food. Also, store grocery bags and scented articles such as soap, hairspray, sunscreen and toothpaste. Cover them to hide them from view. Make sure your windows are closed!

Dispose of Garbage Properly

Put it in bear proof garbage cans where available or secure it with your food. Never bury it.

Hiking Hints

Never Approach Bears

Not even to take their pictures. Some bears may seem “tame” until you get too close or threaten their young. LEAVE BABY BEARS ALONE.

Make Noise

Most bears will avoid people and leave an area when they know people are present. Making noise allows the bear to move away before a confrontation occurs. Most bear attacks are caused when a bear is startled at close range. Remember this is BEFORE you encounter a bear. Noise may initially deter a bear, but in close encounters it could aggravate rather than scare off the bear.

Safety in Numbers

Travel with friends and avoid hiking at night. Make sure children are close to you or at least within sight at all times. Roaming dogs can easily disturb a bear and may lead an angry bear back to you. Keep your dog on a leash.
