## Other Contributors

Charlie Gobar, Forest Wildlife Biologist (retired)

Dolores Maese, Forest Public Affairs Officer (retired)

## List of Agencies, Organizations and Persons to Whom Copies of the DEIS Were Sent

In the letter accompanying the proposed action, we let people know that they would receive a copy of the draft environmental impact statement if they commented or if they specifically requested it. Approximately 1,200 people of the 12,000 on our mailing list commented on the proposed action or asked to receive a copy of the draft environmental impact statement. We sent

the draft environmental impact statement and maps to everyone who commented during the scoping period, and those who asked to receive a copy of it.

In addition, copies have been sent (or in some cases made electronically available) to Federal agencies, federally recognized tribes, State and local governments, and organizations that have requested to be involved in the development of this analysis. These entities include the U.S. Environmental Protection Agency; U.S. Army Corps of Engineers; U.S. Department of the Interior; Federal Highway Administration; Advisory Council on Historic Preservation; USDA National Agricultural Library; State wildlife and fisheries management agencies; county commissions; and local community governments. Due to the number of people, agencies and organizations, a complete listing has been omitted from this EIS, but is available upon request or on the forest Web site at <http://www.fs.fed.us/r3/sfe/travelmgt/index.html>. This list includes those who requested the draft environmental impact statement through June 3, 2010.
