

2006 Aerial Insect and Disease Survey

USGS 100K Quad Yamhill River - A145123; 2H

Defoliators		Mortality Agents	
Code	Damaging Agent	Code	Damaging Agent
AS	Spruce aphid	1	Douglas-fir beetle
BB	Western blackheaded budworm	2	Douglas-fir engraver
BM	Mistle budworm	3	Spruce beetle
BP	Sugar pine tortrix	4	Fire engraver
BS	Western spruce budworm	5	Western balsam bark beetle
BY	Byrrhus black/ochrodemella	6B	Mountain pine beetle
CH	Larch	6C	Mountain pine beetle
LG	Green striped forest looper	6K	Mountain pine beetle
LL	Larch looper	6L	Mountain pine beetle
LS	Black pine needle scale	6M	Mountain pine beetle
MD	Douglas-fir budmoth	6N	Mountain pine beetle
ML	Larch budmoth	6O	Mountain pine beetle
MN	Douglas-fir needle midge	6P	Mountain pine beetle
MS	Spruce budmoth	6Q	Mountain pine beetle
ND	Needle miner	6R	Mountain pine beetle
NJ	Needle miner	6S	Mountain pine beetle
NK	Needle miner	6T	Mountain pine beetle
NL	Needle miner	6U	Mountain pine beetle
NI	Needle miner	6V	Mountain pine beetle
NP	Needle miner	6W	Mountain pine beetle
NS	Needle miner	6X	Mountain pine beetle
NT	Needle miner	6Y	Mountain pine beetle
NW	Needle miner	6Z	Mountain pine beetle
CL	Pine butterfly	7	Larch looper
PC	Pine needle cast	8	Western hemlock looper
PH	Phytophthora needle cast	9	Douglas-fir, Western hemlock
PM	Pandora moth	10	Western larch
PN	Pine needle/needle miner	11	Douglas-fir
PS	Pine needle scale	12	Douglas-fir
RC	Needle cast	13	Douglas-fir
S	Spider mite	14	Douglas-fir
SA	Sawfly	15	Douglas-fir
SB	Sawfly	16	Douglas-fir
SC	Sawfly	17	Douglas-fir
SD	Sawfly	18	Douglas-fir
SE	Sawfly	19	Douglas-fir
SH	Sawfly	20	Douglas-fir
SI	Sawfly	21	Douglas-fir
SM	Sawfly	22	Douglas-fir
SN	Sawfly	23	Douglas-fir
SO	Sawfly	24	Douglas-fir
SP	Sawfly	25	Douglas-fir
ST	Sawfly	26	Douglas-fir
TA	Tent caterpillar, alder	27	Douglas-fir
TC	Tent caterpillar, other	28	Douglas-fir
TD	Tent caterpillar, larch	29	Douglas-fir
TE	Tent caterpillar, spruce	30	Douglas-fir

USGS 100K Quad Yamhill River - A145123; 2H
2006 Aerial Insect and Disease Detection Survey
 Mapscale: 1:100,000
 Date: November 24, 2006

Legend

- 2006 Special Swiss Needle Cast Survey
- Defoliating Agents
- Mortality Agents
- Other Damage
- Areas Not Flown

More information about this special survey and the related data is located under "Maps and Data" at: <http://www.odf.state.or.us/pc/ff/>

The map base was created with TOPO! (Copyright 2001, National Geographic); available online at: www.ngmapster.com

A data dictionary, digital copies of this map and ArcGIS insect and disease data are available at: www.fs.fed.us/r6/nr/rid/data.shtml

How the Aerial Surveys Are Conducted

Data represented on this map are based on trees visibly affected by forest insects and diseases detected and recorded during aerial survey flights conducted by the USDA Forest Service and the Oregon Department of Forestry. Observers have just a few seconds to recognize the color difference between healthy and damaged trees of different species; diagnose causal agents correctly; estimate intensity; delineate the extent of damage; and precisely record this information on a georeferenced, digital map. Air turbulence, cloud shadows, distance from aircraft, haze, smoke and observer experience can all affect the quality of the survey. These data summaries provide an estimate of conditions on the ground and may differ from estimates derived by other methods.

The aerial survey provides information on the current status for many causal agents, and is important when examining insect activity trends by comparing historical and current survey data over large areas.

Overview surveys are a 'snap shot' in time and therefore may not be timed to accurately capture the true extent or severity of a particular disturbance activity. Specially designed surveys with modified flight patterns and timing may be conducted to more accurately delineate the extent and severity of a particular disturbance agent. Special surveys, such as Swiss needle cast surveys, are conducted when resources are available to address situations of sufficient economic, political or environmental importance.

*****DISCLAIMER*****
 The insect and disease data presented should only be used as an indicator of insect and disease activity, and should be ground-checked for precise location, extent, severity and causal agent.
 Color coded polygons show locations where trees were recently killed or defoliated. Intensity of damage is variable and not all trees within coded polygons are dead or defoliated.
 The cooperators reserve the right to correct, update, modify or replace GIS products without notice. Using this map for purposes other than those for which it was intended may yield inaccurate or misleading results.
