**The XSX Allotment will not be available again for grazing until April 14, 2007. Shingle may be used during its winter schedule, if necessary.**

Forage use by grazing ungulates will be maintained at or above a condition that ensures recovery of threatened and endangered species. Site-specific forage utilization standards have been developed for the allotments, as stated in Part 3 of your permit. **In addition, the East Fork, West Fork, and Middle Fork are closed to grazing. No use is authorized in these areas.**

If any one key area in the allotment exceeds allowable-use standards stated in your temporary permit, Part 3, during both the growing season and dormant season, livestock will be moved to another area of the allotment where actual use is less than allowable. If all remaining key areas in the allotment area at maximum use, livestock will be required to be moved from the allotment.

Non-compliance with the instructions set forth in this authorization could lead to adverse actions taken against your Term Grazing Permit.
