Please notify us of cattle movements onto and off of the allotment, as well as refinements that may be needed to enhance the management system. If you identify the need to differ from this management system by more than 15 days, please contact this office at least two weeks in advance so that the district has time to conduct monitoring and assess your request.

2. Utilization Standards and Monitoring:

The maximum allowable use level set for the Deadman Allotment is **35%**; in addition stubble heights should not be less than an average 3 inches on blue and hairy grama. Stubble heights should not be less than 5 inches on sideoats grama, and no less than 6 inches on mountain muhly. Use of browse is not to exceed the **50%** level. Key areas and restricted areas (PAC's) will be visited to determine actual grazing use / seasonal use by livestock and wildlife. If utilization / seasonal utilization levels are approaching allowable use levels, livestock will be required to be removed to areas within the pasture that are not approaching allowable use levels and/or management changes will be made to the rotation schedule the following year. In the event that areas not approaching allowable use levels are not available, livestock will be removed from the allotment. In the event of over utilization, changes will be made to the following year's AOI to prevent recurring instances of over

utilization. The following dates have been tentatively scheduled for monitoring on the allotment. You are highly encouraged to participate in monitoring with district personnel and/or on your own.

Pasture	Monitoring date
Telephone/Barrel	5/24/2006
Eagle Peak	5/25/2006
Holding 1/Collins Park	6/6/2006
Eagle Peak	10/4/2006
Holding 1/Collins Park	12/7/2006

3. Forage Growth and Water Availability:

If forage growth and water availability are not adequate during all or portions of the 2006, total or partial livestock removal from the allotments may be necessary. Part 2, clause 8(c) of the grazing permit provides this option.

4. Grazing Restriction:

The Deadman allotment includes Mexican Spotted Owl Protected Activity Center's (PAC). In these PAC's the following activities are restricted during the breeding season of the Owl (March 1-August 31): livestock concentrations or trailing, fence construction, and livestock salting; routine maintenance is allowed.

5. Range Improvements:

All assigned range developments identified in the Term Grazing Permits must be maintained to a functional status.

In addition, specific maintenance discussed included:

1. The permittee proposes to partially reconstruct the Cox Canyon/Deadman fence #6233, please contact Collin or Jerry for materials and permit modification.
2. The permittee proposes to replace the trough at Elkhorn spring, please contact Collin or Jerry for materials and permit modification.

6. The Annual Operating Instructions are a part of the Term Grazing Permit as provided for in Part 3, Section 8. They comply with the standards and guidelines found in the Forest Plan. They also comply with the Endangered Species Act on-going grazing consultation for the Leggett allotment. Any additional information collected during the year may be incorporated into the annual operating instructions.
