

Annual Operating Instructions (AOI)

Allotments: Apache Canyon

Permittee: Darrell L. and Carolyn D. Julian

Permit Number: 61232

1. **Authorization:** Authorized to graze the following in 2008:

Authorized	From	To	Allotment
80 cow/calf	3/1/08	5/31/08	Apache Canyon
80 cow/calf	11/1/08	2/28/09	Apache Canyon

2. **Management:**

Apache Canyon 2008 Pasture Rotation:

PASTURE	LIVESTOCK	TIME FRAME
Wilson Canyon	All Cattle	3/01/08-3/31/08
Apache Creek Riparian Pasture	Up to 6 Heifers	4/1/08-5/31/08
Off allotment	All Cattle	4/1/08-8/15/08
Apache Canyon 1, 2, and 3, & Highway	All Cattle	8/16/08-9/30/08
Off Allotment	All Cattle	10/1/08-10/15/08
Mesa	Hospital/heifer pasture	as needed
Piney Park	All Cattle	10/16/08-1/15/09
Wilson Canyon	All Cattle	1/16/09-2/28/09

No Livestock are allowed within the riparian area of the Tularosa River on National Forest System Lands. Please maintain all fences and water gaps necessary to keep your cattle out of the Tularosa River on NFS lands.

Please notify us of cattle movements onto and off of the allotment, as well as refinements that may be needed to enhance the management system. If you identify the need to differ from this management system by more than 15 days, please contact this office at least two weeks in advance so that the district has time to conduct monitoring and assess your request.

3. **Utilization Standards and Monitoring:**

The maximum allowable use level set for the Apache Canyon Allotment is **35%**. Key area utilization monitoring will continue. Monitoring will be conducted at the approximate

midpoint of the scheduled use period and/or within two weeks before to two weeks after the date cattle are scheduled to leave a pasture. Key areas will be visited to determine actual grazing use/seasonal use by livestock/wildlife. If utilization levels are approaching allowable use levels, livestock will be required to be moved to areas within the pasture or other pastures that are not approaching allowable use levels. In the event that areas not approaching the allowable use are not available, livestock will be removed from the allotment when allowable use rates are met. Management adjustments will be made to the following years Annual Operating Instructions to avoid recurring instances of over utilization. The following dates have been tentatively scheduled for monitoring on the allotment. You are highly encouraged to participate in monitoring with district personnel and/or on your own.

Pasture	Monitoring date
Wilson Canyon	3/19/08
Mesa	5/29/08
Apache Canyon 1, 2, 3 & Highway	9/17/08
Apache Creek Riparian pasture	5/21/08
Piney Park	1/27/09

4. Forage Growth and Water Availability:

If forage growth and water availability are not adequate during all or portions of the 2008, total or partial livestock removal from the allotments may be necessary. Part 2, clause 8(c) of the grazing permit provides this option.

5. Salt and Supplement Policy

Supplemental feeding of livestock is allowed (to strategically manage livestock distribution and forage use) as follows:

- a) Place supplements on previously disturbed areas (i.e., borrow pits) or natural bedrock outcrops when possible (supplement sites).
- b) Locate supplement sites 0.25 mile or more from waters and key areas except where prior written permission has been obtained from District Ranger.
- c) Locate supplement sites where forage is abundant and utilized less than average.
- d) Limit supplement types to non energy feeds such as salt, protein and mineral blocks.
- e) Use products that prevent the spread of noxious weeds (no feeding of hay on National Forest System Lands).

6. Range Improvements:

All assigned range developments identified in the Term Grazing Permit must be maintained to a functional status.

In addition, specific maintenance discussed included:

Fences: The permittee will remove the dilapidated elk enclosure at Apache Creek, the pipe from the enclosure will be used to reconstruct the Porterwell corral #6440. Prior to beginning this work please contact Jerry for a permit modification.

Water: Permittee proposes to clean Sawmill Spring #6298 and if sufficient water is produced, the permittee will repair the spring box, and attach a pipeline (app. ¼ mile) to White Mule Spring Pipeline to supplement water from White Mule Spring (contact Jerry for available materials). The rockheader #6042 will be cleaned.

Advanced planning is needed for authorizing tank cleaning so surveys can be scheduled during the summer months. Please protect natural springs and areas with riparian type vegetation. Drainage bottoms, creeks, springs, and cienegas, where water is available, are most susceptible to livestock concentrations.

7. **The Annual Operating Instructions** are a part of the Term Grazing Permit as provided for in Part 3, Section 8. They comply with the standards and guidelines found in the Forest Plan. Any additional information collected during the year may be incorporated into the annual operating instructions.

This decision is subject to administrative review, pursuant to 36 CFR 251; and any appeal of this decision must be fully consistent with 36 CFR 251.90 (see enclosed copy of 36 CFR 251 regulations). In accordance with 36 CFR 251.84, if you file an appeal, I am willing to meet with you to discuss any concerns you may have with my decision. If you file an appeal, you may request an oral presentation in the appeal or at any time prior to closing of the appeal record (36 CFR 251.97). Additionally, if you file an appeal, you may request a stay of my decision in the appeal or at any time prior to closing of the appeal record (36 CFR 251.91).

A notice of appeal must be filed with Richard E. Markley, Forest Supervisor, Gila National Forest, 3005 E. Camino del Bosque, Silver City, New Mexico, 88061-7863, within 45 days of the date of this decision. A copy of the notice of appeal must be filed simultaneously with Rogers M. Steed, District Ranger, Reserve Ranger District, at P.O. Box 170, Reserve, NM 87830.

Feel free to contact Jerry Turner or myself at (575) 533-6231 if you have any questions or problems concerning this document.
