- 17. Regionally Significant Wildlife Corridor**

Changes in Appendix A Between Draft and Final EIS

The gate symbol was added to map legends for Maps 2 and 3 (Alternatives 2 and 3) showing road closure locations. All of the gates in the analysis shown on the map have year-round closures and roads behind them are not open to public motorized travel. Gates on Whitney Road #032 and Gold Hill Road #081 at their junctions with Highway 150 are not shown on the maps. These gates are only closed when necessary to prevent motorized use during spring breakup.

The road symbol on maps 14 and 15 (ROS Maps) is for all roads not just open roads. Many of the roads on these maps are behind closed gates. The wording was changed from “open roads” in the DEIS map legend to “roads” in the FEIS map legend.

An improved vicinity map replaces the DEIS version.

Map #16, Past Harvest was added to the FEIS.

Map #17, Regionally Significant Wildlife Corridor was added to the FEIS.
