## Project WET Workshop for Educators

Project WET (Water Education for Teachers) is an interdisciplinary water education program featuring classroom-proven, hands-on learning activities that make water topics come alive for students that was recently updated. Come get the latest interdisciplinary water education activity guide and materials.

Project WET has K-12 activities that are correlated to Common Core Standard and are correlated to the Next Generation Science Standards (NGSS). They cover:

- Physical & chemical properties of water
- Cycles, seasons and Earth's systems
- Weather, Climate
- Water as a resource
- Human impacts & cultural constructs
- Life, Earth, and Nature of Science

Participants receive:

- Project WET Activity Guide Version 2.0, a full-color, 592 page guide with 64 multidisciplinary activities.
- Access to the Project WET portal, an online resource where educators can search, share, learn and have discussions related to Project WET's educational materials.
- 6 hours of hands-on activities, PDH's, snacks and other resources.

*Project WET is active in more than 50 countries on 5 continents. The only way to get the guide is to attend a workshop. To learn more about Project WET, please visit <http://projectwet.org>*
