

Fall Colors on the Allegheny National Forest

This week's fall color report:

On the ANF, We had rain (and snow!) last weekend, so many of the trees are bare. However, on the Bradford Ranger District, staff report that there is still some color but it is very dull and almost past peak.

This will be our last report for the season.

To see other color reports:

- [Northeastern United States](#) (Forest Service Region 9)
- [National Fall Colors Website](#) (Forest Service Washington Office)

We will also add slides from the ANF as we receive them. The photos in this slide show are from previous years. We anticipate this year's fall colors to be just as beautiful!
