

Glenwood Ranger District

Gila National Forest

ANNUAL OPERATING INSTRUCTIONS

2015

Harve Gulch Allotment #409

Mogollon Allotment #413

Prepared By: /s/ DK Brown
District Range Staff

Date: 12/18/14

Approved By: /s/ Debbie C Cress
District Ranger

Date: 12/18/14

Annual Operating Instructions

I. INTRODUCTION

Kendall Brown (Forest Service) met with Joe Faust (permittee) on December 18, 2014, to discuss management of the Harve Gulch/Mogollon Allotment during the current grazing year and to plan grazing management for the upcoming grazing season. These Annual Operating Instructions are the result of that discussion.

Term Permitted Livestock Numbers

Number and class of livestock	Dates
79 Cattle-cow/calf	03/01 – 02/28
New permit pending for Harve Gulch/Mogollon combined allotment. Decision signed on 09/18/2014 to authorize up to 106 head (cow/calf).	

Harve Gulch Allotment Annual Authorization

Number and Class of livestock	Dates Authorized
79 Cattle-cow/calf	03/01 – 02/28
27 Cattle – cow/calf (Mogollon)	03/01 – 02/28

Harve Gulch Allotment Pasture Rotation

Class of Livestock	Rotation Date	Pasture
Cow/calf	03/01 – 04/30	Upper Houston & Golddust (half of herd)
Cow/calf	03/01 – 04/30	Hospital & Whitewater II (half of herd)
Cow/calf	05/01 – 06/30	Harve Gulch East (gathering & branding)
Cow/calf	07/01 – 09/15	Harve Gulch West
Cow/calf	09/16 – 10/30	Whitewater I
Cow/calf	11/01 – 11/15	Harve Gulch East (gathering & shipping)
Cow/calf	11/16 – 02/28	Carcass Basin (½ herd) Upper Houston/Golddust (½ herd)
	GROWING SEASON REST	Harve Gulch East

NOTE – no cattle are permitted within the town of Mogollon or in Whitewater Creek. If cattle are found in these locations, they must be removed promptly and fences constructed or repaired to keep cattle out of these areas.

The above schedule for stocking the allotment depends upon the availability of forage and water. Some flexibility in the above pasture rotation dates will be allowed for justifiable causes such as weather conditions, livestock management needs, and range conditions. If there is a need to deviate from the above pasture rotation schedule by more than 15 days, you must notify the District Ranger of the proposed change in the pasture rotation date and the reason for the change. A deviation from the above schedule of more than 15 days must be approved by the District Ranger verbally or in writing. The District Ranger must be notified 5 days prior to the time livestock enter or

leave the Forest if the placing on or removal of livestock is not planned in the above schedule, and more than 10 head are being moved.

II. MANAGEMENT OF LIVESTOCK

You are responsible for monitoring water availability and forage utilization. It is your responsibility to move your livestock when sufficient water is no longer available or when proper forage utilization is achieved in a pasture. You are responsible for keeping track of and maintaining control of your livestock. In the event your livestock are found to be out of the scheduled pasture, you will be required to find, gather, and return your animals to the proper pasture as soon as possible.

III. IMPROVEMENT MAINTENANCE

All range improvements assigned in the 10-year Term Grazing Permit should be maintained in a functioning condition. In the event these improvements cannot be brought up to a functioning condition, you should notify this office so we can schedule them for reconstruction as funds become available.

~~Fence #3104 from Bursum Road SW toward Dripping Gold Spring and Whitewater Canyon burned during 2012 Whitewater/Baldy fire and needs replacement. We will try to get this fence reconstructed this year. COMPLETED IN 2014.~~

You widened and leveled the spillways for Upper Twin Tank (004271), Lower Twin Tank (004270), and Frisco Tank (004195) in 2012, but the spillways need hardening. These three tanks received damage during the September 2013 flood and need repair. You plan on using erosion blocks to prevent cutting on these spillways. These blocks will be provided to you by the Glenwood Ranger Station. Cultural clearances are in place for these tanks.

We will check on cultural resource clearances before you replace the pipeline from Harve Gulch Windmill to steel rim storage in West Harve Gulch pasture.

IV. GENERAL INSTRUCTIONS

1. Fire: Branding and warming fires should be used with good judgment: not on windy days or during times when fires are specifically restricted. The Glenwood District is planning to allow naturally ignited fires to burn on the district this coming year. We will notify you if we plan to let a fire burn on your allotment.

2. Records: In order to close out permit modifications you must provide documentation of materials and labor constituting your contribution to the permit modification.

You must provide documentation of cattle numbers; dates of entering and leaving pastures, shipping dates and cattle losses (grown stock and calves). This information is used to substantiate the carrying capacity of the allotment. The information demonstrates use and the need for forage to meet the economic needs of the county. This information may also be used to establish cause and effect if there is a significant change in calf crop (Example, a wolf pack becomes established near your allotment).

3. Heavy Equipment Use: Please notify district well in advance of any plans to use heavy equipment so that necessary clearances and/or permits can be obtained. You will be notified by the district when you can proceed.

4. Credit/Refund: Any credit or refund applications for grazing fees must be made as far in advance as possible. Credit/Refund applications are not retroactive and will be approved only if the District Ranger is notified of livestock removal, prior to, or at the time, the livestock are taken off the allotment. **You will be required to provide your Social Security or Tax ID number in order for a refund to be processed.**

A \$25 administrative fee will be charged for any additional bills for collection that are sent to you due to either late payment or for split billing on seasonal allotments. This fee will be collected to pay for the cost associated with issuing an additional bill for collection. There is no administrative fee for the normal "split billing" on yearlong allotments.

It is necessary for you to write the bill number on your check prior to submitting it to the lockbox. This is necessary to insure that your payment is credited to your account.

5. Short Age Calf Policy: Any short-aged calves (calves less than 6 months old on December 31) must be removed from the National Forest by April 1, or you will need to apply for and pay grazing fees for these animals from April 1 to the time they are removed from the National Forest. Calves that are 6 months old or older on December 31 need to be paid for starting January 1.

6. Salting and Supplemental Feeding:

- a. Feeding of hay on National Forest land will not be permitted unless a proven need to use the supplement is shown, and a detailed plan is developed and approved.
- b. Feeding of vitamin or mineral supplements, protein blocks, or molasses licks on National Forest land is permitted when used in the same manner as salt.
- c. Salting practices will be in agreement with the 10-Year Term Grazing Permit. Salt will be placed in areas of available feed to help draw cattle to them. Salt will not be placed within ¼ mile from water and/or in natural concentrations areas which receive heavy grazing use.

V. ALLOTMENT STATUS

The Harve Gulch/Mogollon Allotments environmental analysis process was completed in 2014. A decision notice was signed by District Ranger Debbie Cress on 09/18/2014. Management direction provided in these Annual Operating Instructions follows the EA, DN, and AMP developed for this allotment.

VI. OTHER ITEMS DISCUSSED

You indicated that you are in favor of Fire Use on your allotment. The District Ranger will authorize necessary changes to this AOI to accommodate fire management.

VII. SPECIAL MANAGEMENT CONCERNS

Keep track of conditions on your allotment and make plans to reduce or remove livestock if vegetative/watershed conditions could be substantially harmed due to continued grazing. The forecast for the upcoming winter and spring is dry and warm. If dry conditions continue through the summer growing season, a reduction in herd size may be recommended. If the herd size is reduced, restocking of allotments to full

numbers will not take place until forage plants regain vigor.

VIII. UTILIZATION MONITORING OF KEY AREAS

Monitoring schedule

Pasture	Monitoring Date	Allowable Use	Key Area
Upper Houston & Golddust Hospital & Whitewater II	05/01	Conservative (31 – 40%)	Pasture wide
Harve Gulch East	07/01	Conservative (31 – 40%)	Pasture wide
Harve Gulch West	09/15	Conservative (31 – 40%)	Pasture wide
Whitewater I	11/01	Conservative (31 – 40%)	Pasture wide
Carcass Basin	03/01	Conservative (31 – 40%)	Pasture wide

Monitoring of herbaceous forage will be conducted by ocular estimate of use within a pasture (utilization mapping). Verification of ocular estimates will be conducted using common methodology such as weigh/clip, grazed plant numbers, or stubble height. Grazing use will be described and mapped in the following utilization categories.

Qualitative Grazing Intensity Category	Use of Forage by Weight	Qualitative Indicators of Grazing Intensity
Light to no-use	< 30%	Only choice plants and areas show use. There is no use of poor forage plants.
Conservative	31-40%	Choice forage plants have abundant seed stalks. Areas more than a mile from water show little use. About on third to one half of primary forage plants show grazing on key areas.
Moderate	41-50%	Most of accessible range shows use. Key areas show patch appearance with one half to two thirds of primary forage plants showing use. Grazing is noticeable in zone 1-1.5 miles from water.
Heavy	51-60%	Nearly all primary forage plants show grazing on key areas. Palatable shrubs show hedging. Key areas show a lack of seed stalks. Grazing is noticeable in areas over 1.5 miles from water.
Severe	61 +%	Key areas show a clipped or mowed appearance (no stubble height). Shrubs are severely hedged.

		There is evidence of livestock trailing to forage. Areas over 1.5 miles from water lack stubble height.
Holechek, J.L. and D. Galt. 2000. Grazing Intensity Guidelines. Rangelands 22(3), pg 11-14.		

Monitoring of utilization on woody riparian will be conducted in the areas below and concurrently with the associated pasture. (See Table Below)

Pasture	Reach description	Management	Allowable Use
West Harve Gulch	San Francisco River from the Harve Gulch drainage to the North boundary of the Bighorn Allotment.	Excluded by fencing and natural barrier	0%
Carcass Basin	San Francisco River from the Harve Gulch drainage downstream to private land.	Excluded by fencing and natural barrier	0%
Golddust	Whitewater Creek	Excluded by fencing and natural barrier	0%

If unforeseen operational conditions require a change in the management specified in this AOI please contact rangeland management personnel at the Glenwood Ranger District to obtain approval of change(s). Advanced notice of change is requested so that field inspections can be conducted. Verbal approval of changes will be followed with a letter documenting the change.
