* Evaluation Polygon 1378 was evaluated as a whole, but it overlays the boundary between the Sierra and Sequoia National Forests and portions of it are on each national forest. The figures here represent only the acres of the evaluation polygon and acres of potential recommended wilderness that fall within the Sierra National Forest. Additional potential recommended wilderness was derived from this evaluation polygon and that information can be found on the table titled "Summary of Portions of Evaluation Polygons under Consideration for Potential Recommended Wilderness in Alternatives B and C for the Sequoia National Forest."
