

**Summary of Portions of Wilderness Evaluation Polygons under Consideration for Inclusion
in the Draft Environmental Impact Statement as
Potential Recommended Wilderness in Alternatives B and C for the Inyo National Forest**

Table 1. Potential wilderness recommendations under consideration for inclusion in Alternatives B and C of the draft environmental impact statement

* In previously publicly shared information about areas being considered for inclusion in one or more alternatives as potential recommended wilderness, this area was call “Deep Springs South.” It is been renamed “Pilot Mountain Wilderness Additions (1)”.

** Evaluation Polygon 1391 was evaluated as a whole, but it overlays the boundary between the Inyo and Sequoia National Forests and portions of it are on each national forest. The figures here represent only the acres of the evaluation polygon and acres of potential recommended wilderness that fall within the Inyo National Forest. Additional potential recommended wilderness was derived from this evaluation polygon and that information can be found on the table titled “Summary of Portions of Evaluation Polygons under Consideration for Potential Recommended Wilderness in Alternatives B and C for the Sequoia National Forest.”
