Applying for Temporary Fire Positions

The Forest Service has a new application system. We will be utilizing USAJOBS, which is the Federal Government's official job search website.

The internet address is: www.usajobs.gov

On this website, the first thing you will be required to do is to create a profile, with a username and password, where you will describe your work experience and your level of education within "Resume Builder". When applying for a Federal job, you should be very detailed and precise in describing your work experience. Always remember, the personnelists who will be qualifying your application cannot assume you have specific knowledge; you must say it in writing. You will also have the option of attaching additional separate resumes to your profile. This is a good idea since you will not be limited to 5,000 characters as you are in the usajobs Resume Builder narrative blocks. You can have a total of 5 separate resumes attached in your profile, including the one created in Resume Builder. You will be required to attach documentation to verify your fire qualifications and your education (if higher than high school). If you claim to have a college degree, you must attach college transcripts however they do not have to be official.

Upon completion of your profile, you can begin applying for jobs. You can search www.usajobs.gov using the announcement numbers specific to the GS level you are applying for. Type the vacancy announcement number in the Keyword Search window.

A referral list (a list of qualified applicants) will be generated from these announcement numbers. If your application has not been submitted before the deadline date, you will not be considered for the position(s).
