Basic Firefighter

Course Description

These courses are designed to provide entry-level firefighter skills. Students receive instruction in the primary factors affecting the start and spread of wildfire and recognition of potentially hazardous situations. Field time is encouraged, and many of the units are set up to be taught in either the classroom or the field. In a portion of this course, students engage in the process of designing their own safety program. The small groups will discuss and develop the L, C, E, and S, creating a list of performance standards. The entire class will then work together to produce and edit a contract, based on consensus, which guides performance. In a version of L-180, Human Factors on the Fireline, students will be able to practice decision-making skills in an interactive simulation as a member of a fire crew, and students will apply their Human Factors knowledge to a variety of scenarios.

Crew Boss/Engine Boss

Course Description

This course contains a mix of online and instructor-led training (ILT). Students are required to complete the online portion of the course and pass an online assessment prior to taking the ILT. The focus of the online training is to teach knowledge and concepts. The ILT will reinforce the content learned online and provide opportunities to apply this knowledge to real-world scenarios and practical exercises. Upon completion of the ILT, students must pass a final assessment in order to receive credit for the course. The final assessment covers content from both the online and ILT portions of the course.
