Applying for Temporary positions with the US Forest Service via USAJobs

Contact the work supervisor identified on the following pages to get more information about the job and work location. To apply for these temporary jobs you will need to apply through the USAJobs website - <https://www.usajobs.gov>. **Announcements will open January 25th, 2016 and close on January 29th, 2016. (Please note that announcements open on Eastern Standard Time, so they will close on January 29th at 9:00pm PST).** Please contact the person listed in the table for questions regarding an office/station location, announcement numbers, dates to apply, and the number of positions available.

APPLY ONLINE at www.USAJOBS.gov

Step 1: Create a USAJobs account (if you do not already have one) at www.USAJOBS.gov. It is recommended that as part of your profile you set up automatic email notification to be informed when the status of your application changes. If you choose not to set up this automatic notification, then you will have to log into your USAJOBS account to check on the status of your application.

Step 2: Create a resume with USAJOBS or upload a resume into your USAJOBS account. You may want to customize your resume to ensure it documents duties and accomplishments you have attained that are directly related to this position, so your application will meet required qualifications.

Step 3: Search for the job announcement number. **(Note: Temporary job announcements are NOT open at this time. If you respond to the outreach notice, we will contact you with the information necessary to apply for open positions. Questions regarding a specific position or office/station location should be directed to the contact name listed in the table).** You can update your application or documents anytime while the announcement is open. Simply log into your USAJOBS account and click on “Application Status”. Click on the position title and then select “Update Application” to continue.

About the Forest

The Lake Tahoe Basin Management Unit (LTBMU) is located in the Sierra-Nevada Mountain Range, at 6,225 feet above sea level. The LTBMU is organized and administered as a National Forest, but without ranger districts. The LTBMU Supervisor's Office is located at 35 College Drive in South Lake Tahoe, California.

Over 78% of the area around the lake is public land managed by the United States Department of Agriculture (USDA) Forest Service. Totaling over 154,000 acres, this land includes beaches, hiking and biking trails, wilderness, historic estates and developed recreation areas such as campgrounds and riding stables. The forest is managed to provide access for the public and to protect the natural resources of the area. We hope you will join us in ensuring that the lake and surrounding lands will be even more beautiful and healthy in the future than they are now.

The Lake Tahoe Basin is comfortable in the summer, with daytime temperatures averaging 80 degrees Fahrenheit and evenings turning cool and crisp. Afternoon thunderstorms are common in the summer, though their durations are usually on the order of only minutes to a few hours and do nothing to dampen the spirits of boaters, hikers, mountain-bikers, and picnickers. During the autumn, the brilliant yellow color of aspen leaves provides a wonderful contrast to the deep green color of the pines. Winters are cold, but below-zero temperatures at night are rare. Winter snowfall averages about 6-feet to 10-feet per year adjacent to the lake and over 30 feet per year on the spectacular mountain peaks that surround the Basin. Exceptional alpine and downhill skiing, snowboarding, telemarking and Nordic/cross-country skiing are enjoyed from November through April. The sun shines on the Basin more than 330 days every year.
