

Lake Logging System and Temporary Road Map

CLACKAMAS RANGER DISTRICT - MT HOOD NATIONAL FOREST

Sheet 1 of 3

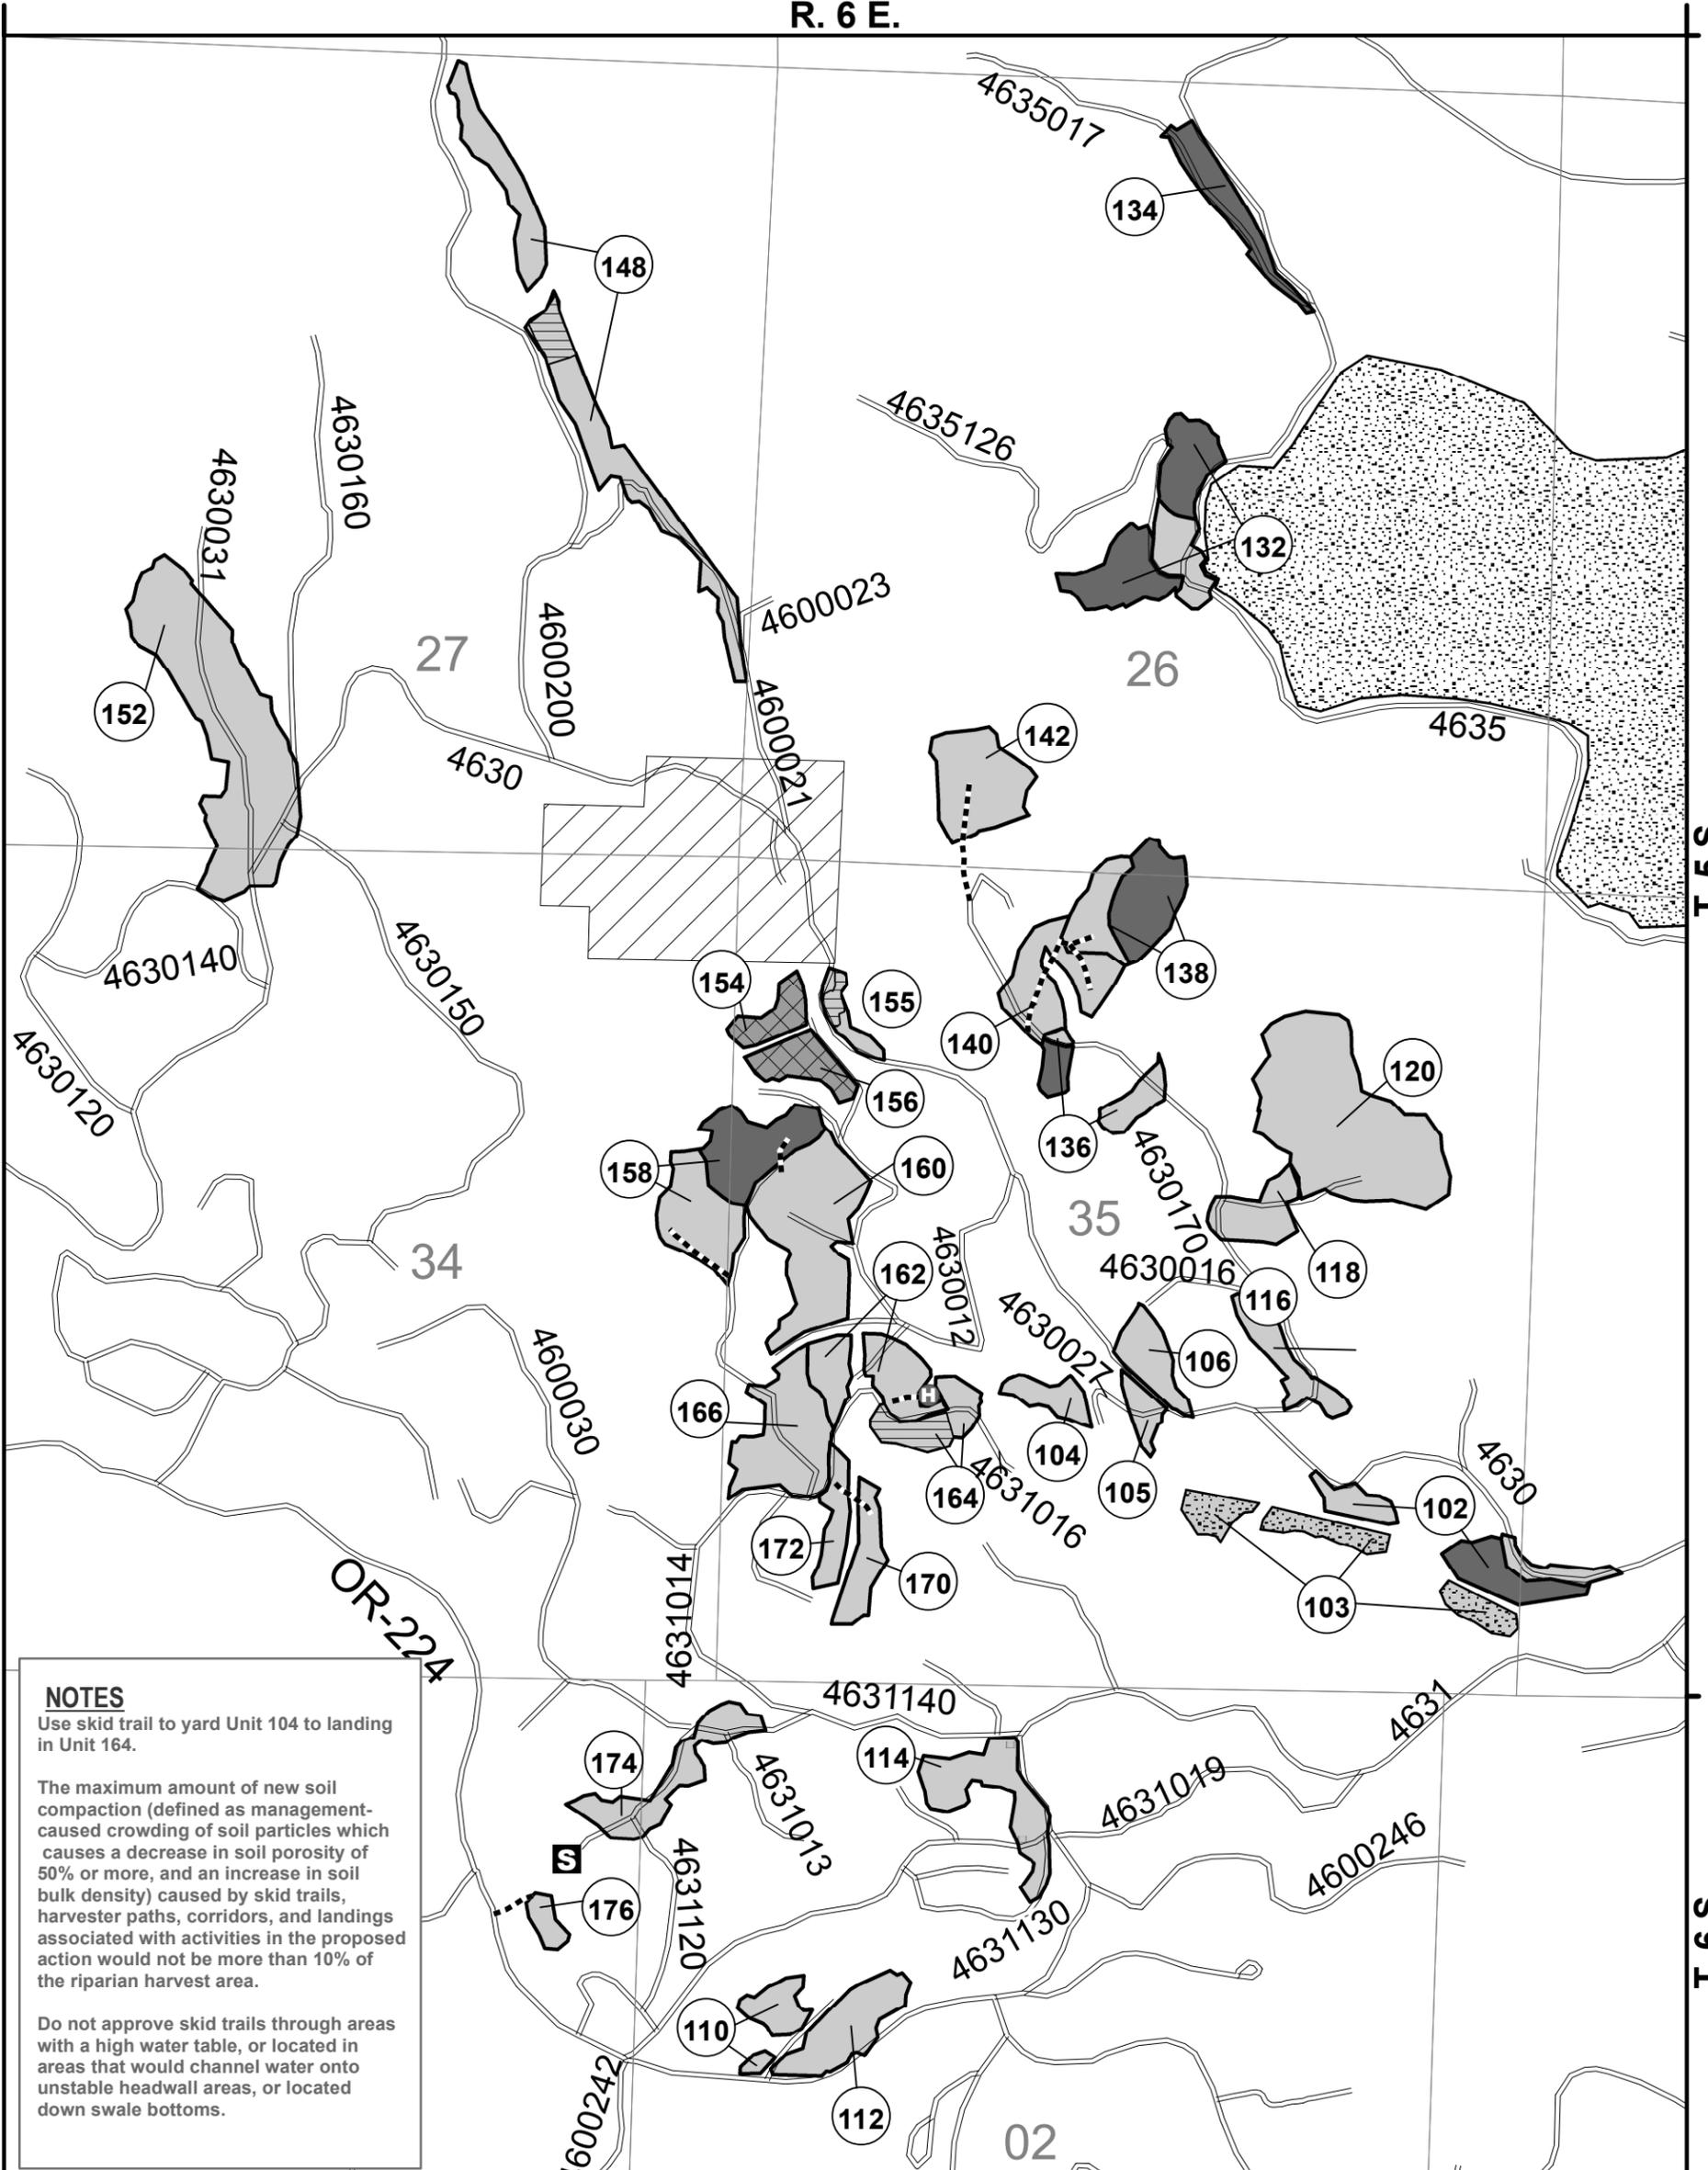

LEGEND

-  Ground-based
-  Endline
-  Helicopter
-  Skyline
-  Swing
-  Exiting Road
-  Potential Temporary Roads
-  Helicopter Log Landing
-  Helicopter Service Landing
-  Other Ownership
-  Wilderness

NOT A CONTRACT MAP; EK, 2/19/16

R. 6 E.

NOTES

Use skid trail to yard Unit 104 to landing in Unit 164.

The maximum amount of new soil compaction (defined as management-caused crowding of soil particles which causes a decrease in soil porosity of 50% or more, and an increase in soil bulk density) caused by skid trails, harvester paths, corridors, and landings associated with activities in the proposed action would not be more than 10% of the riparian harvest area.

Do not approve skid trails through areas with a high water table, or located in areas that would channel water onto unstable headwall areas, or located down swale bottoms.
