

Requirements to Proceed with Phase II

RCR Actions

- Submit detailed mine plans, including final plans for rock mechanics data collection and subsidence monitoring, for the KNF's and DEQ's approval at the completion of Phase I;
- Submit a modified and/or updated Plan of Operations/hard rock permit application for the mine consistent with Alternative V, as described in the Final SEIS and associated ROD;
- Submit a modified and/or updated reclamation portion of the Plan of Operations for the mine consistent with Alternative V, as described in the Final SEIS and associated ROD;
- Submit a modified and/or updated monitoring portion of the Plan of Operations for the mine as outlined in Appendix K, consistent with Alternative V, as described in the Final SEIS and associated ROD;
- Submit modified and/or updated Monitoring Action Levels and Contingency Action Plan portion of the Plan of Operations for the mine as outlined in Appendix K, consistent with Alternative V, as described in the Final SEIS and associated ROD;
- Submit a reclamation performance bond for mine construction and mine development;
- Submit pertinent data outlined in the Final SEIS and associated ROD to Technical Advisory Groups (TAGs) for review and recommendation;
- Submit final facility design plans and mitigation to be implemented during mine construction, if not submitted earlier.

USFS (and Montana DEQ) Actions

- Formation of TAGs by the USFS that would develop guidance on monitoring and data collection, review data, and provide advice on issues defined by the USFS;
- Approve detailed mine plans, including final plans for rock mechanics data collection and subsidence monitoring;
- Approve a modified and/or updated Plan of Operations/hard rock permit application for the mine;
- Approve a modified and/or updated reclamation portion of the Plan of Operations for the mine;
- Approve a modified and/or updated monitoring portion of the Plan of Operations for the mine;
- Approve a modified and/or updated Monitoring Action Levels and Contingency Action Plan portion of the Plan of Operations for the mine;
- Accept a reclamation performance bond for mine construction and mine development;
- Approve final facility design plans and mitigation to be implemented during mine construction, if not submitted earlier.
