Request For Quote Questions and Answers:

**Were the sizes of furniture on the maps checked to fit correctly in the new location?** The measurements were verified with the furniture measurements from the list of excess furniture located in Missoula. The furniture is not going to be installed the same as it was in the previous location.

**How was the furniture stored?** The furniture in Missoula was taken apart and packaged by a modular furniture company for storage last year.

**Was the list of excess furniture and parts verified with the inventory?** Yes, a Forest Service employee looked at the items. All similar items are on the same pallet. A few of the larger desk tops are stored to the side of the warehouse. It will be the responsibility of the contractor to make sure the list of furniture from the map are transported.

**Is there other items in storage in front of the furniture and parts? Will items need to be moved to get to the excess furniture?** Some of the items are behind other pallets. A Forest Service employee will be present during pickup and are available to operate a forklift to move the pallets for accessibility.

**Do you have any pictures or drawings of the furniture prior to storage?** Yes, below are pictures of the furniture. This does not show how the components will be installed at the Forest Service in Dillon, Montana.
