

**BLACK CANYON C&H ALLOTMENT
2016 ANNUAL OPERATING INSTRUCTIONS**

Boise National Forest
Mountain Home Ranger District

INTRODUCTION

The following information is direction on how livestock management is to be conducted on the Black Canyon Cattle & Horse (C&H) Allotment for the 2016 grazing season. The Annual Operating Instructions (AOI) are part of your Term grazing Permit consistent with Part 1, Item 3 and Part 2, Item 8(a), and you are responsible for compliance with this direction.

Situations may develop during the grazing season that could require changes to these instructions. If this becomes necessary, or if you cannot comply with some part of these instructions, contact Holly Hampton at 587-7867 or Cindy Lancaster at 587-7870, and obtain approval before initiating or deviating from your AOI. Failure to obtain prior approval could result in permit action.

The following table displays the permitted numbers and seasons of use for the Black Canyon Allotment:

Allotment Name	Permitted Number and Class	Permitted Season of Use
Black Canyon - on	7 cow/calf	05/01-10/31
off	53 cow/calf	05/01-10/31

For the 2016 grazing season, you are authorized to graze the Black Canyon Allotment as follows:

Allotment Name	Authorized Number and Class	Authorized Season of Use
Black Canyon - on	7 cow/calf	05/01-10/31
off	53 cow/calf	05/01-10/31

Some flexibility will be allowed for weather conditions, range readiness and livestock needs. The period of use is also subject to compliance with Forest Plan standards and guidelines and Implementation Monitoring requirements as discussed below. Please review carefully the standards and guides listed.

BILLING INFORMATION

The grazing fee for the 2016 grazing season is \$2.11 per head month for cattle. You will be billed based on the authorized use listed above. Confirmation of payment through the National Finance Center is required and must be received before livestock can enter National Forest System lands. In order to meet this requirement, please ensure that bills for collection are paid by the due date indicated.

Wildlife escape ramps need to be installed in tire troughs. These ramps are being supplied by the Forest Service. These ladders should be installed in all tire troughs prior to turn-on. This direction also includes troughs that hold water in the spring but dry up later in the grazing season. Failure to comply could result in adverse action to your permit. Please contact Holly or Cindy as soon as possible if you need to pick up escape ramps.

RIDER OR PERMITTEE INSTRUCTIONS

Off date for this allotment is considered approximate and will depend on utilization levels. To prevent over-utilization, a concerted effort should be made to distribute cattle over the entire allotment and to effectively graze all suitable areas in that unit. Permitted numbers are based on the premise that active management will occur to effect adequate livestock distribution. Cattle need to be moved before meeting riparian and upland grazing standards. If cattle are allowed to concentrate in riparian areas and water developments without being distributed to unused areas of the allotment, the grazing capacity of the allotment is diminished to those areas only.

Permittee monitoring of utilization levels is not mandatory, but is highly advised since permittees will be held accountable for any failures to meet end-of-season compliance monitoring.

REQUIRED REPORTING

Enclosed is a Year-end Grazing Report for you to record actual use data and range improvement maintenance for the 2016 grazing season for the Black Canyon Allotment. You need to record the date and number of cattle turned onto the allotment, the number and date cattle are removed from each unit, and estimate the time and cost of management actions, including livestock herding and improvement maintenance, associated with each allotment. Accurate records of these dates, maintenance work, and range improvement needs should be kept and returned to our office at the end of the grazing season. The Forest Service uses these records to help allocate Range Betterment Funds. These funds are used to purchase materials for improvements. **This report should be returned to the Forest Service's Mountain Home Ranger District office no later than December 1, 2016.**

If you are planning to waive your Term Grazing permit – based on either sale of permitted livestock or base property, please submit this intention to me in writing prior to the transaction.

INSPECTIONS AND MONITORING

Range personnel may require you to delay your entry date on the Black Canyon Allotment based on range readiness inspections that they have completed. You will be notified as soon as possible if your turn-on date is delayed.

Range personnel may conduct utilization monitoring and improvement inspections periodically on your allotments.

COORDINATION AND COOPERATION

The Idaho Department of Fish and Game is responsible for wolf management in Idaho. The Regional Wildlife Wolf Biologist for the Fish and Game is Jennifer Struthers. Any questions you may have regarding wolf management should be directed to her. She can be reached at 208-465-8465 ext. 350.

If you suspect a wolf depredation has occurred on your livestock, USDA/APHIS/Wildlife Services (Wildlife Services) should be contacted as soon as possible. The local Wildlife Services contact for this area is Jered Hedelius. He can be reached at (208) 681-8756. In the event that you cannot reach Jered, Todd Grimm should be contacted at the Boise District Office at 208-373-1630.

OTHER

When livestock carcasses are located near campgrounds, roads, trails or water reasonable and appropriate action must be taken to remove any carcasses. The permittee will contact the District Ranger's Representative to discuss the problem and determine what action would be appropriate for each site specific instance. Although the Forest Service recognizes that disposal of carcasses is not always feasible in many situations there are a number of reasonable options for the disposal of single or multiple carcasses. In most cases, carcasses should be moved at least 100 yards from campgrounds, roads, trails or water. Animal carcasses in highly visible areas need to be relocated to more remote areas.

The Forest Service's Motor Vehicle Use Rule is in place on the Mountain Home Ranger District. Public motorized, wheeled vehicle use is prohibited on all NFS lands except on routes that are designated on the current year's Motorized Vehicle Use Map. This AOI authorizes you and your employees to use wheeled motor vehicles off of designated routes for administrative use within your allotments for livestock management purposes. However, specific routes will need to be identified each year. See description of routes needed for administrative use below. This administrative use includes salting and herding of livestock, maintenance of range improvements, and forage utilization inspections. Use of heavy equipment, such as bulldozers or backhoes is **not** included in this authorization. Use of heavy equipment will need to be requested through and approved by the District Ranger on a case-by-case basis.
