BURDEN AND NONDISCRIMINATION STATEMENTS

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-0085. The time required to complete this information collection is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call toll free (866) 632-9992 (voice). TDD users can contact USDA through local relay or the Federal relay at (800) 877-8339 (TDD) or (866) 377-8642 (relay voice). USDA is an equal opportunity provider and employer.

GENERAL CONDITIONS

The Purchaser, by signing Page 1, binds the Purchaser and the Forest Service, acting through the Contracting Officer, to the contract terms.

1. The boundaries of the sale area, payment unit, and any cutting or harvesting areas are as shown on the attached sale area map, which is made a part of this contract. All sale area map detail indicating location is approximate; therefore, actual locations, as the Forest Service has designated on the ground, take precedence over the sale area map. The location of the sale area and its estimated acreage are shown on Page 1.

Valid claims are excluded from the sale area, unless the claimant authorizes, in writing, timber cutting or product harvesting on the claim, except for valid claims on which timber cutting or product harvesting is authorized under the Act of July 23, 1955 (30 USC 612, 613, and 614).

2. The Purchaser's failure to execute and return this contract in conformance with the terms, conditions, and requirements contained in the Contracting Officer's letter of award shall constitute repudiation of the Purchaser's bid and breach of this contract. The Purchaser agrees that the Purchaser's bid guarantee, if required in the advertisement, shall be retained by the Contracting Officer to be applied toward damages due the United States.

3. The Purchaser shall complete all requirements of this contract prior to the termination date. A time extension may be granted at the discretion of the Contracting Officer if the Purchaser has operated in a diligent manner.

4. The Forest Service has determined the estimated quantities of included products listed on Page 1 prior to award of this contract. The Contracting Officer or designee will determine any additional designated products prior to felling or harvesting during the term of the contract. The Forest Service makes no representation, warranty, or guarantee of the accuracy of the estimate.

5. This contract is non-transferable.

6. No Congress Member or Resident Commissioner shall benefit from this contract unless made with a corporation for its general benefit (18 USC 431,433).

7. The conditions of this contract are completely set forth, and none of its terms can be varied or modified, except by written agreement between the Purchaser and the Contracting Officer approving the contract, or the Contracting Officer's successor, or superior officer, and in accordance with the regulations of the Secretary of Agriculture.

8. No Purchaser, contractor, subcontractor, agent, or employee shall discriminate in performance of this contract against any person on account of race, color, religion, age, sex, or national origin.

9. The Forest Service agrees to sell and the Purchaser agrees to purchase, cut or harvest, and remove all included products described on Page 1. Designation(s) for cutting is (are) shown in Other Conditions. Title to all timber or forest products included in this contract shall remain with the United States until its estimated quantities have been determined by the Contracting Officer or designee and paid for and removed from the sale area by the Purchaser. The Purchaser shall not cut or harvest any timber or forest products until the Contracting Officer or designee has determined the estimated quantities and the timber or forest products has been paid for by the Purchaser.

The Purchaser shall cut or harvest and remove included products in strict accordance with the conditions on Page 1, the General Conditions, and with all conditions and requirements in the attached Other Conditions,

which are hereby made a part of this contract, and with the regulations prescribed by the Secretary of Agriculture.

The Contracting Officer or designee may designate additional timber products, if included products is timber, not included in the original volume estimate for cutting within the sale area, as needed to utilize damaged trees, trees to be removed in authorized clearings, or trees unnecessarily damaged or cut by the Purchaser. The Purchaser shall pay for additional timber at rate per products and associated charges per unit of measure listed on Page 1, in addition to any payments for liquidated damages under General Condition 15 and/or in Other Conditions. The additional timber will become included products when designated by the Contracting Officer or designee.

The Contracting Officer or designee and the Purchaser may agree in writing to make minor adjustments in boundaries of cutting units or in the timber individually marked for cutting.

10. As a further guarantee of the faithful performance of the provisions of this contract, the Purchaser shall maintain a cash performance bond in the amount listed on Page 1.

11. The Purchaser shall pay to the USDA Forest Service by the time the contract is required to be executed and returned by the Purchaser, the total sale value for total products and total associated charges stated on Page 1, for product values which includes sale area betterment funds (Act of June 9, 1930, 16 USC 576b), slash disposal funds (Act of April 24, 1950, 16 USC 490), and road maintenance deposits, if any.

12. The Contracting Officer or designee may, in writing, suspend operations on the sale area, including removal of included products, if the Purchaser violates contract requirements, or the Contracting Officer may terminate this contract for the Purchaser's serious or continued violations of its terms.

The Purchaser agrees to interrupt or delay operations under this contract, in whole or in part, upon the written request of the Contracting Officer: (a) to prevent serious environmental degradation or resource damage that may require termination of the contract, (b) to comply with a court order, or (c) upon determination of the appropriate Regional Forester, that conditions existing on this contract area are the same as, or nearly the same as, conditions existing on contract(s) named in such an order as described in paragraph (b).

13. The Contracting Officer may terminate this contract, without liability to the Government, to prevent serious environmental degradation, to comply with a court order, or for the convenience of the Government.

14. All monies paid under the contract shall, upon the Purchaser's failure to fulfill the terms of the contract, be retained by the Contracting Officer to be applied toward completion of Purchaser's uncompleted work or damages due the United States.

15. The Purchaser shall pay for unnecessary damage to or negligent or willful cutting of merchantable timber, if timber is an included product, meeting utilization standards on Page 1 at an amount equivalent to the bid rate. In view of the difficulty in determining the actual damage to the United States, the amounts specified above shall be considered liquidated damages; provided, that, if such damage involves small amounts of material, and in the judgment of the Contracting Officer or designee, is justified by existing conditions, the payments may not be required. In addition to liquidated damages, if designated for removal by the Contracting Officer or designee under General Condition 9, the Purchaser shall make payments at the rate per products listed on Page 1 for timber meeting utilization standards and for associated charges for the total quantity of material involved.

The Contracting Officer or designee shall determine rates for products per unit of measure for standing timber or other forest products if they are not included products using standard Forest Service appraisal methods.

The right, title, and interest to any product for which payment of liquidated damages has been made or which has been regularly paid for, cut, but not removed, shall remain in or revert to the United States, if not removed from the sale area at the expiration or termination of this contract.

16. This contract is subject to The Contract Disputes Act of 1978 (Pub. L. 95-563). Purchaser claims under this contract shall be submitted in writing to the Contracting Officer not later than 60 days after receipt of the Contracting Officer's written notice to the Purchaser that the sale is closed.

17. The Purchaser shall obtain certifications from its lower tier participants regarding debarment, suspension, ineligibility, and voluntary exclusion (7 CFR 3017.510). The Purchaser shall provide a copy of such certifications to the Contracting Officer at the Contracting Officer's written request.

18. The Contracting Officer may designate in writing a Forest Service Representative to: (a) receive notices in regard to performance under this contract, (b) take action in relation to this contract, and (c) be readily available to the area of harvest operations.

The Contracting Officer or the Forest Service Representative may designate other Forest Service on-the-ground representatives. The Contracting Officer or Forest Service Representative shall name these persons in writing along with their specific contractual responsibilities and authority and the Contracting Officer shall provide a copy to the Purchaser. The Contracting Officer shall make these delegations within 30 days of award of the contract.

19. The Purchaser shall buck harvested trees, if trees are included products, to use the entire merchantable stem, cut stumps no higher than the maximum specified on Page 1 when measured on the uphill side, and use material to the minimum utilization standards listed on Page 1.

20. The Purchaser and Purchaser's employees shall take reasonable action to prevent and suppress forest fire. Further, the Purchaser, in all phases of logging or harvesting operations, shall protect insofar as practicable: all land survey corners, telephone lines, ditches, fences, and other improvements. If the Purchaser's operations damage such improvements under this contract, the Purchaser shall restore these improvements immediately to the condition existing immediately prior to operations. The Purchaser shall handle slash and other refuse as listed in Other Conditions. The Purchaser shall pay for road maintenance commensurate with the Purchaser's use. The Purchaser shall promptly restore roads or trails damaged through such use. Specific road maintenance requirements are listed in Other Conditions and costs are included in associated charges listed on Page 1.

The Purchaser's use of existing roads may be restricted, as indicated on the sale area map and in the Other Conditions.

The Purchaser shall comply with the rules and regulations governing operation on premises that are occupied, and the Purchaser shall perform the contract in a manner that will not interrupt or interfere with the conduct of Forest Service business.

Sale Name: Slump Salvage

1# - PRODUCT DESIGNATION (07/1998)

The Forest Service designated timber or forest products for cutting or harvesting prior to award of this contract. The designated timber or forest products is confined to the sale area and has been designated in the following manner: Leave Tree Marking (individual trees). Trees to be left uncut are marked above and below DBH in pink paint.

Trees that meet utilization standards i.e. have a 9" stump diameter, (measured at 1' stump height), are 8' in length, (small end diameter of 6" inside bark) and 8.0 merchantability specifications (50% sound) are designated for cutting. All dead, and wind thrown trees, that meet utilization standards in Unit 1 as shown on the Sale Area Map are also designated for cutting.

3 - LOAD TICKETS (07/1998)

The Purchaser shall complete and return assigned load tickets according to the Contracting Officer or designee's written instructions. Unused load tickets shall be returned to the Contracting Officer or designee at termination date.

4 - PRODUCT IDENTIFICATION (11/1999)

Before removal from the sale area, unless the Contracting Officer determines that circumstances warrant a written waiver or adjustment, (a) all products 8 feet or more in length and 1/3 or more sound shall be hammer branded on each end that is 7 inches or more in diameter and (b) all domestic processing products 8 feet or more in length and 1/3 or more sound shall be painted with a spot of highway-yellow paint on each end that is 7 inches or more in diameter. Each paint spot must be not less than 3 square inches in size.

The Contracting Officer shall assign brands and brands shall be registered with the State, if the sale area is within a State that maintains a log brand register. The Purchaser will furnish and apply highway-yellow paint of a lasting quality (oil-base or equivalent).

All hammer brands and/or highway-yellow paint must remain on logs until they are domestically processed. If the identifying marks are lost, removed, or become unreadable, they shall be replaced. The Purchaser may remanufacture products into different log lengths. Except for logs remanufactured as part of the mill in-feed process immediately before processing, remanufactured products must be re-branded with the assigned sale brand and repainted with highway-yellow paint, unless otherwise agreed to in writing by the Contracting Officer. For such remanufactured products, the Contracting Officer may approve use of a brand to be used exclusively as a catch brand, in lieu of the assigned sale brand.

6 - EROSION CONTROL (07/1998)

The Purchaser shall: (1) not operate equipment when soil conditions are such that excessive damage will result, as determined by the Contracting Officer or designee; (2) construct erosion control structures, as needed to control erosion as determined by the Contracting Officer or designee; (3) repair promptly any existing erosion control structures damaged by the Purchaser's operations; (4) complete seasonal erosion control work prior to suspending operations; and (5) perform other soil erosion control work that may be required under this contract.

Sale Name: Slump Salvage

8 - TEMPORARY FACILITIES (07/1998)

The Contracting Officer or designee shall approve the location and clearing limits for all landings and skid trails prior to their construction. The cleared or excavated size of such construction shall not exceed that needed for the Purchaser's safe and efficient operations. After landings have served the Purchaser's purpose, the Purchaser shall ditch or slope them to permit water to drain or spread. Unless the Contracting Officer or designee agrees otherwise, the Purchaser shall slope cut and fill banks around landings to remove overhangs and otherwise minimize erosion. After a skid trail has served the Purchaser's purpose, the Purchaser shall effectively block the skid trail to normal vehicular traffic where feasible under existing terrain conditions and build cross ditches and water bars, as staked or otherwise marked on the ground by the Contracting Officer or designee.

10# - USE OF ROADS BY PURCHASER (06/1999)

The Purchaser's use of existing roads identified on the sale area map by the following codes is prohibited or subject to restrictive limitations, unless the Contracting Officer or designee agrees in writing otherwise:

Code Use Limitations
X Hauling prohibited
R Hauling restricted
P Use prohibited
A Public use restriction
W Regulation waiver

Roads coded A will be signed by the Contracting Officer or designee to inform the public of use restrictions. Purchaser's use of roads coded R, A, or W shall be in accordance with the following restrictions:

See Table A

Table A
 10# - USE OF ROADS BY PURCHASER (06/1999)

Road Number	Road Name	Termini		Map	Description of Restrictions
		From	To	Legend	
NFSR 474.2C	Carter Mountain Road to Pete Miller Park beyond the gate.	Gate	Thru Sale Area	A	A portion of National Forest Service Road 474.2C from the gate is closed to the public full sized vehicles (>50" wide) Oct. 1 to July 15 th annually. Hauling is Prohibited.
NFSR 474.2C	Road to Pete Miller Park.	East side of Sale Area Boundary	To the East	X	

Sale Name: Slump Salvage

14 - EQUIPMENT CLEANING (07/2000)

Unless the entire sale area is already infected with noxious weeds, the Purchaser shall ensure that, prior to moving on to the sale area, all off-road equipment, which last operated in areas known by the Forest Service to be infected with noxious weeds, is free of soil, seeds, vegetative matter, or other debris that could contain or hold seeds. The Purchaser shall certify in writing that off-road equipment is free of noxious weeds prior to each start-up of timber sale operations and for subsequent moves of equipment to sale area. Measures taken to ensure that off-road equipment is free of noxious weeds will be identified. Off-road equipment includes all logging and construction machinery, except for log trucks, chip vans, service vehicles, water trucks, pickup trucks, cars, and similar vehicles. A current list of noxious weeds of concern to the Forest Service is available at the Forest Supervisor's Office.

The Purchaser must clean off-road equipment prior to moving between cutting units on this timber sale that are known to be infested with noxious weeds and other units, if any, that are free of such weeds. Sale area map shows areas, known by the Forest Service prior to timber sale advertisement, that are free of specific noxious weeds species of concern.

The Purchaser shall employ whatever cleaning methods are necessary to ensure that off-road equipment is free of noxious weeds. Equipment shall be considered free of soil, seeds, and other such debris when a visual inspection does not disclose such material. Disassembly of equipment components or specialized inspection tools are not required.

The Purchaser shall notify the Forest Service at least 5 working days prior to moving each piece of off-road equipment on to the sale area, unless otherwise agreed. Notification will include identifying the location of the equipment's most recent operations. If the prior location of the off-road equipment cannot be identified, the Forest Service may assume that it was infested with noxious weed seeds. Upon request of the Forest Service, the Purchaser must arrange for the Forest Service to inspect each piece of off-road equipment prior to it being placed in service.

If the Purchaser desires to clean off-road equipment on National Forest land, such as at the end of a project or prior to moving to a new unit that is free of noxious weeds, the Purchaser and the Forest Service shall agree on methods of cleaning, locations for the cleaning, and control of off-site impacts, if any.

New infestations of noxious weeds, of concern to the Forest Service and identified by either the Purchaser or the Forest Service, on the sale area or on the haul route, shall be promptly reported to the other party. The Purchaser and the Forest Service shall agree on treatment methods to reduce or stop the spread of noxious weeds when new infestations are found.

Sale Name: Slump Salvage

15# - SLASH TREATMENT (04/2003)

Slash is defined as logs, tops, limbs, and other woody material, exclusive of stumps, which is created by the logging operation and remaining on the ground after logging. In areas where Purchaser-created slash is intermingled and inseparable from pre-existing slash, slash disposal requirements shall apply to the pre-existing slash as well as the Purchaser-created slash. Such areas are designated in the Purchaser Slash Responsibility Table herein.

Unless otherwise agreed in writing, Purchaser shall perform the following work described below and/or as shown on the Sale Area Map and/or Slash Disposal Map.

Forest Service and Purchaser shall jointly develop a schedule for completion of slash treatment on the various portions of the sale area.

See Purchaser's Slash Responsibility Table

Purchaser's Slash Responsibility Table

Cutting Unit(s)	Type of Slash Disposal	Description
1	Lopped and Scatter	Logging slash shall be scattered away from and without un-necessary damage to residual trees. All scattered logs shall be limbed, placed away from trees and positioned so they will not roll. Other logging slash shall be scattered to reduce slash concentrations with slash generally left within 24 inches of the ground.
1	Fell Damaged Residuals	Purchaser shall fell all species over 6 feet in height not meeting minimum diameter specifications for Included Timber that are damaged beyond recovery by the Purchaser's operations. Such trees shall be limbed to a stem diameter of approximately 4 inches, at which point the top shall be cut from the remainder of stem. These stems shall be bucked into lengths shorter than 8 feet. Slash shall be scattered to reduce slash concentrations with slash generally left within 24 inches of the ground.
All	Landing cleanup	A landing is considered a place where any logs or products are gathered for loading. Logs not meeting utilization standards accumulated at landings shall be piled as agreed to in writing by the Forest Service. Piles shall be reasonably compact and free of soil to facilitate burning. Piles will not be less than 4 feet in height. Piles shall be of a size and in a location which will not impair road use or result in damage to residual timber. Piles shall be located at least 20 feet from residual timber. Piles shall not be more than 100 feet long. All objects which extend more than 8 feet in any direction from the pile will be cut and returned to the pile.

Sale Name: Slump Salyage

20a - FIRE PRECAUTIONS (04/2003)

1. Smoking and Lunch Fires. Smoking is prohibited except inside a building, developed recreation site, vehicle, or while seated in an area of at least three feet in diameter that is barren or cleared of all flammable materials. 36 CFR 261.52(d).

The building of camp, lunch, warming and other fires within the sale area and vicinity is prohibited, except at established camps or at other safe places where all flammable material has been cleared away sufficiently to prevent the start and spread of wildfires. Forest Service may, upon written request of purchaser, designate specific places where campfires may be built for purposes of heating lunches.

2. Spark Arrester and Mufflers. Operating or using any internal combustion engine, on any timber, brush, or grass covered land, including trails and roads traversing such land, without a spark arrester, maintained in effective working order, meeting either (I) Department of Agriculture, Forest Service standard 5100, "SPARK ARRESTERS FOR INTERNAL COMBUSTION ENGINES," (current edition); or (II) the Society of Automotive Engineers (SAE) Recommended Practices J335, "MULTIPOSITION SMALL ENGINE EXHAUST SYSTEM FIRE IGNITION SUPPRESSION," (current version) and J350, 36 CFR 261.52(j) is prohibited.

Passenger carrying vehicles, pickups, medium and large highway trucks (80,000 GVW) will be equipped with a factory designed muffler system which is specified for the make and model of the respective vehicle/truck or with a muffler system that is equivalent or that exceeds factory specifications.

Exhaust systems shall be properly installed and continually maintained in serviceable condition.

3. Fire Extinguishers and Tools on Equipment. While in use, each internal combustion engine including tractors, trucks, yarders, loaders, welders, generators, stationary engines, or comparable powered equipment shall be provided with at least the following:

(a) One fire extinguisher, at least 5#ABC with an Underwriters Laboratory (UL) rating of 3A - 40BC, or greater.

(b) One shovel, sharp, size 0 or larger, round-pointed with an overall length of at least 48 inches.

(c) One axe, sharp, double bit 3-1/2#, or one sharp pulaski. Extinguishers, shovels, axes, and pulaskis shall be mounted so as to be readily available from the ground. All tools shall be maintained in a serviceable condition.

4. Power Saws. Each gasoline engine power saw shall be provided with one chemical-pressurized fire extinguisher of not less than 8-ounce capacity by weight, and one size 0, or larger, round-pointed shovel with an overall length of at least 48 inches. The extinguisher and shovel shall be maintained in good working order. The extinguisher shall be with the power saw operator and immediately available for use at all times. The extinguisher shall not be affixed to the saw. The shovel shall be readily available to the operator of the saw at all times. Having the shovel with the gas can used to refuel the saw may be considered "readily available" if not more than 200 feet from the saw. During periods of critical fire danger, Forest Service may prescribe other precautionary measures.

Any fueling or refueling of a power saw shall be done in area which has first been cleared of material which will carry fire. The power saw shall be moved at least 10 feet from the place of fueling or refueling before starting.

5. Blasting and Welding. The use of fuses in blasting shall not be permitted except near power lines where the danger of accidental detonation is present, and then only by special written permission of Forest Service. Whenever the relative humidity falls below 50 percent, Purchaser shall place a watchman at each point where blasting is done who shall remain on duty for at least one hour after blasting is finished, and who shall be equipped with shovel and a water-filled backpack can equipped with a hand pump. During periods

Sale Name: Slump Salvage

when the relative humidity falls below 20 percent, blasting shall be discontinued unless authorized, with special provisions, in writing by Forest Service. Blasting shall not be permitted in any area not cleared to mineral soil without advance written approval of Forest Service and with such special precautions as may be required.

Prima Cord shall not be used in clearing operations, and in other areas where timber has been felled and slash not burned.

Unless otherwise directed in writing by Forest Service, all flammable material shall be cleared for 10 feet around any piece of equipment being welded. In addition, Purchaser shall provide a fire extinguisher of a size and type designed to extinguish a fire in the flammable materials surrounding the spot being welded.

In order to determine the relative humidity, Purchase shall either (a) provide and maintain weather instruments, that will measure relative humidity, in the area where blasting will occur; or (b) provide communications to obtain weather data from Forest Service.

Explosives shall be stored at all times in a locked box marked "Explosives". Powder and blasting caps shall be stored in separate boxes.

6. Storage of Flammables. Gasoline, oil, grease and other highly flammable material shall be stored either in a separate building, or at a site where all debris is cleared within a radius of 25 feet. Storage buildings or sites shall be a minimum distance of 50 feet from other structures. Storage buildings shall be adequately posted to warn of the flammables and to prohibit smoking in or around the building.

7. Camp Fire Protection. The grounds around all trailers, buildings, other facilities constructed or placed on or near Sale Area shall be kept free of flammable material for a distance of at least 20 feet from the wall of such structure. Burning of such flammable material shall be as prescribed by Forest Service in writing.

Stovepipes of all wood burning stoves shall be equipped with suitable roof jacks and serviceable spark arresters. Stovepipes shall be no closer than 2 feet from any wood or other flammables unless adequately protected from by metal or asbestos shields.

21 - WILDLIFE PROTECTION MEASURES (01/2010)

1. The Forest Service may order an immediate temporary suspension of all treatment activities within the Sale Area if needed to resolve potential or existing grizzly/human conflicts. Operators shall immediately comply with this direction. It should be noted that the United States shall not be liable for any consequences from any such suspensions that are less than 10 days in length.

2. Operators assume full responsibility and shall hold the United States harmless from any and all claims by the operators, their employees, or third parties for any damage to life or properties arising from the activities authorized by this Timber Sale Contract and encounters with grizzly bears from suspensions of activities authorized under this Timber Sale Contract.

3. All personnel working under the terms and conditions of this Timber Sale Contract become familiar with and comply with the USFS Occupancy and Use Restriction Special Order currently on file at the Shoshone National Forest offices. Storage of all foods will follow applicable food storage order. Lunches, snacks, and beverages shall be contained in an enclosed vehicle or bear-resistant container at all times, except when being consumed. No personnel should intentionally approach closer than 100 yards to a grizzly bear. Intentional or negligent acts by the operators, their employees, or third parties that result in injury or death of a grizzly bear could be cause for suspension or termination of this Timber Sale Contract in whole or part.

4. Garbage, unused foods, petroleum products, antifreeze, and other bear attractants shall be removed from the site daily or stored in acceptable bear-resistant containers.

5. All personnel operating on the timber sale are required to be trained in measures to minimize human/bear conflicts, as well as proper attractant storage, bear behavior, recommended human behavior in conflict situations, and the use of bear repellent spray.
