## Scope and Statement of Work

### **Introduction/Background**

The Hoosier National Forest is in south-central Indiana and contains approximately 203,000 acres of National Forest System (NFS) lands. The two zones are the Brownstown Ranger District and the Tell City Ranger District. Brownstown Ranger District includes Brown, Jackson, Lawrence, Martin, Monroe, and Orange Counties. Tell City Ranger District includes Dubois, Crawford, Orange, and Perry Counties. Prior to the acquisition of lands by the Forest Service, nearly all forests had undergone repeated clearing to create small farms, logging, burning, and grazing by domestic livestock. This history of disturbance has contributed both directly and indirectly to the establishment of non-native invasive plants (NNIP) throughout the Hoosier. The primary objective of this solicitation is to remove or reduce the vigor and size of invasive plant populations, thereby minimizing the threat to native plant communities and wildlife.

### **General Treatment Specifications**

The treatment for various patches of NNIP will depend on factors such as, location, patch size, the response of invasive species to the seasons, concentration of NNIP, and surrounding vegetation. NNIP plant treatments may include the use of hand methods, machinery, and chemicals to eliminate NNIP when possible or at least appreciably reduce their presence in the treatment areas. Only the use of Environmental Protection Agency (EPA) approved, non-restricted use chemicals are to be used. Other EPA approved herbicides may only be acceptable with prior approval of the contractor officer representative (COR).

Other applicable actions associated with this contract may involve the potential need for cutting and mowing of larger shrubs or woody vines in conjunction with foliar application of herbicides. The Hoosier *Forest Plan* guidelines make recommendations for the timing of mowing in forest openings to minimize disturbance to ground nesting birds. Generally, design criteria in project-level EAs prohibit mowing during April 1<sup>st</sup> through July 31<sup>st</sup> in old fields and grassland openings.

The Contractor shall provide all expertise, labor, supervision, services, herbicides, carriers or adjuvants, materials, equipment, tools, supplies, transportation, licenses, permits, worker personal protective equipment (PPE), and incidentals necessary to perform the required work, for which the desired outcome is in strict accordance with the standards in the contract. The Contractor shall perform and accomplish the work in accordance with all applicable federal, state, and local laws, regulations, and ordinances. Contractors shall use selective herbicides or a selective method to reduce to surrounding non-target vegetation. The Scope of Work will list any additional necessary requirements.

Herbicide applicators shall use typical herbicide concentrations according to all EPA approved manufacturer herbicide directions. The Contractor will mix herbicides in accordance with manufacturer's instructions and any applicable laws or regulations. Application operations shall be conducted as indicated on the herbicide label, including approved concentrations, rates/acre, and environmental conditions. Only chemicals for aquatic use in or adjacent to streams shall be used whenever directed at or adjacent to waterways and wetlands such as the aquatic formulation of glyphosate (Rodeo ® or equivalent product).

The Contractor is responsible for the cleanup of any spills and will notify the COR immediately of any spills. The contractor must have herbicide labels and copies of material safety data sheets (MSDS) of chemicals used on site. The contractor must provide copies or notification by telephone or email of herbicide labels and MSDS of chemicals to the COR prior to the start of work.

This contract does not allow any *indiscriminate* broadcast applications or aerial spraying. Where appropriate, vehicle or ATV/UTV/OHV mounted sprayers is permissible to apply herbicides in designated old fields or grassland openings, and along roads. Other spot spraying, typically involves the use of backpack sprayers or other hand techniques, and along some wider trails ATV/UTV/OHV mounted sprayers is also permissible. Use

of suitable dye is required to indicate where applicators have sprayed or used herbicides. Contractors cannot use ATVs with liquid cargo tanks exceeding 15 gallons.

For foliar herbicide application during the growing season, the contract will require the use of selective herbicides or a selective method of application to reduce effects to the surrounding non-target vegetation. Foliar herbicide application will occur mainly after full leaf expansion and applicators will apply herbicides in a systematic fashion to provide coverage to the entire NNIP infestation. Contractor shall apply foliar spray in such a manner to thoroughly wet foliage, but not to the point of runoff to avoid harm or mortality to desirable non-target plant species. Other work may involve NNIP control of woody shrubs, trees, and woody vines by using a combination of herbicide treatment and mowing or cutting.

Contractor will place caution signs around the sprayed areas according to the appropriate interval per label directions of the chemical used in application areas where the public may have contact with herbicide (e.g. trails, parking areas). Where necessary per label directions, caution signs may include a temporary closure of treatment areas.

Contractor will conduct treatments to at least 90-95% of the specified project area(s) of the target NNIP infestation(s) as identified in the Scope of Work. Contractor will conduct treatments at a sufficient interval and concentration to meet or exceed the kill rate ranging from 85-90% for target NNIP infestations, and with no more than 10-15% mortality to nearby or interspersed desirable non-target native plant species because of inadvertent treatment or overspray of herbicides (refer to Quality Assurance Plan); or values specified in the Scope of Work.

The Contractor shall progressively accomplish the work at a rate that will result in completion of the work within the time specified as determined by the final accepted work schedule for the awarded contract.

Forest Service COR or Contract Inspectors may conduct visual inspection of NNIP treatments on site to check on their progression to ensure the Contractor is following the specified requirements of the contract. The COR may conduct random inspections and sampling to verify acceptable kill rates to target NNIP infestations and mortality to non-target desirable native plants. At the discretion of the COR, the Forest Service will accept work based on visual inspection, to confirm kill rates to both target NNIP species and non-target native plant species.

**All herbicide applicator staff** must be able to identify target NNIP plant species in the field, including during dormant seasons, to a sufficient degree without exceeding the maximum acceptable levels of mortality to desirable non-target native species and to meet minimum kill rates to target NNIP infestations (refer to Quality Assurance Plan).

### **Recordkeeping and Daily Logs/Diary**

Minimum record requirements include copies of hazardous material handling certificates, copies of material safety data sheets (MSDS) of chemicals used, and the location of the waste site and/or use destination locations.

Contractor will maintain an accurate daily treatment log of work activities and chemicals applied in treatment areas per contract, with a copy made available to the COR at billing or upon request. At a minimum, the Contractor shall provide to the COR, a copy of the daily treatment log no later than upon submission of the final invoice. When invoicing for partial work payments, the Contractor shall provide information from the daily diary regarding the herbicide treatments done for the relevant specific contract line items. The daily log must record the Contract Line Item, target NNIP species', chemical used (product name), quantity of herbicide (volume applied & unit of measure per each target NNIP species' –including product and carrier/dilutant), application rate (active ingredient applied & unit of measure or percent solution), and adjuvant used (product name & rate applied, if any). The log will record weather information consisting of wind velocity (MPH), wind direction, air temperature (F), condition (cloud cover), and precipitation (inches). Other log requirements

includes date, time of day (start time and stop time), treatment location, approximate acres treated, hours to complete task, type of application (method/technique), name of licensed commercial applicator, other licensed applicators and non-certified applicators, type of equipment used, plus optional information such as any other miscellaneous notes or observations.

### **Equipment Cleanliness**

Prior to starting work, the Contractor must clean all equipment used in NNIP control activities before entering the treatment areas. Project COR will inspect equipment on-site and may require further cleaning before moving to another treatment area as needed. Equipment must also meet FS fire and safety requirements.

### **Licensing and Certification**

**The Contractor and/or whoever will supervise the herbicide treatment must possess a current Indiana commercial pesticide applicators certification and license (category 2) at the time of any herbicide treatments. Most contracts will require work requirements in category 2 (Forest Pest Management), which is applicable for all treatments on the Forest.**

**The Contractor must also possess a current Indiana Commercial Pesticide Business License. Information on Indiana pesticide certification is available at <http://www.isco.purdue.edu/>.**

**The Contractor, or subcontractor, shall ensure that there is either an Indiana pesticide licensed applicator on-site at all times of treatment or registered technicians that are in direct voice communication by telephone or radio with the certified supervisor.**

### **Inspections**

The Contractor may set up the Work Plan and Schedule to include interim inspections; however, interim inspections will only be done upon completion of at least one line item (CLIN). The Contractor shall complete the CLIN work according to the approved Work Schedule then request an inspection by the COR. Contractors are reminded that some work, such as herbicide application, cannot be immediately inspected, because an appropriate time interval must pass before determining whether the AQL has been met.

### **Invoicing**

Invoicing is tied to successful inspection of work. The Contractor may only invoice after the COR has inspected the line item(s) work and the work is determined to have met the AQL. This applies to both interim and final payments.

### **Safety Plan**

The Contractor will provide a written safety plan that demonstrates how the contractor will ensure a safe work environment for themselves, their employees. The safety plan should include: 1) a chemical spill plan documenting internal procedures, in the event of a pesticide spill on-site or in transport, 2) documentation to substantiate that the Contractor has an ongoing safety training program, 3) documentation regarding any Occupation Safety and Health Administration (OSHA) actions/citations issued against the Contractor within the previous three (3) years, to include follow-up measures or remedies taken by the Contractor. The same safety plan information is required of subcontractors.

## **ATV/UTV Use**

Wet weather conditions may preclude the use of vehicles and all-terrain vehicles (ATVs), utility terrain vehicles (UTVs) or off-highway vehicles (OHVs) in off road areas along trails or fields for indefinite periods or possibly the entire area at certain times of the year. The COR will determine those conditions or locations that warrant cessation of vehicle or ATV/UTV/OHV use.

## **Contract Line Item Treatment Categories:**

***Foliar Herbicide Treatment Category - Herbaceous Flowering Plants, Grasses, and Vines/Semi-woody Vines: Open Land NNIP and Roadside Grasses*** – (Non-selective Herbicide and/or in combination with Selective Herbicide):

Contractor shall apply foliar herbicide in specified locations and times as identified. Typically, work done in these areas is for treatment of smaller scattered infestations and/or NNIP populations that are interspersed with desirable native plant species. Work done in these areas is in selected areas of infestations of NNIP where herbicide use could occur throughout the year. However, if the SOW includes treatment in grasslands, some areas may have restrictions prohibiting herbicide application from April 1<sup>st</sup> to July 31<sup>st</sup> to avoid direct effects on ground nesting birds.

Contractor will apply herbicide at a sufficient interval and concentration to meet or exceed the kill rate on target NNIP infestations and not exceed the maximum specified mortality to non-target plant species as indicated on SOW. As indicated, most treatments would occur in grassland areas or along trails and roads in either groups or singular infestations. Because species in this line item category exist primarily in a monoculture or isolated individuals and groupings the potential for harmful overspray is on the periphery of the treatment areas.

Depending on the location, extent and size of the infestation, the contractor may use either backpack sprayers and hand techniques and vehicle or ATV/UTV/OHV mounted sprayers to apply herbicides in old fields and openings. Other work will occur mainly along roads and trails. Foliar herbicide application will occur only after full leaf expansion.

Typically, the Contractor will apply non-selective herbicide such as glyphosate (Roundup ® or equivalent product) in these NNIP infestations and/or use selective herbicide such as (Plateau ® or equivalent product) for control of tall fescue and other NNIP plants. Another option is to use a combination treatment of both non-selective and selective herbicides to meet the objectives. Other EPA approved herbicides may be acceptable with prior approval of the COR.

Some grassland areas may have restrictions on when herbicide application can occur to prevent harm to ground nesting birds.	At least 90% of target NNIP infestation(s) treated.  No more than 10-15% mortality to nearby or interspersed desirable non-target native plant species.  AQL determinations are made by the COR upon inspection of the work.  These determinations are unilateral and not protestable	Minimum 85% kill of target NNIP infestation(s)  <b>AND</b>  Less than 15% mortality to non-target plant species'; or values specified on the SOW. **\*Meeting the AQL for Line Items:** Exceeding the specified mortality value to non-target desirable plants, will result in the Contractor(s) **not** meeting all elements of the AQL values and **not** receiving payment. Contractor(s) must reapply the required herbicide, or mechanical work, at their expense upon failure to meet AQL values at the final inspection for each contract line item where the work performed failed to reach the minimum acceptable target kill ratio of the NNIP infestation(s).

## **Statement of Work and Project Specifications for BOONE CREEK LESPEDEZA:**

### **General Requirements:**

The initial draft specific Work Plan and Schedule will indicate how the Contractor intends to meet the required Acceptable Quality Level (AQL) values, as well as the contract specifications, within the time allotted. The Work Schedule will provide dates of work for each Contract Line Item Number (CLIN) addressed, to include completion of all work before the required final date specified. The Contractor shall inform the COR of completion of each contract line item.

Upon issuance of the contract, the Contractor will then submit a final site-specific Work Plan and Schedule, including any changes in values or proposed chemical differing from the initial Work Plan for approval by the COR. The Contractor will inform the COR of any relevant changes to the technical specifications when performing work under the contract. The contractor will submit a Work Plan and Schedule, which optimizes the effectiveness of the foliar application for each target NNIP species as specified by the individual Contract Line Item Numbers (CLIN).

As specified, the contractor will complete a daily dairy with information requested for each contract line item (CLIN) and provide a copy to the COR no later than with the final invoice.

The performance period for the Boone Creek Lespedeza contract line items (CLIN) is approximately 4 months beginning on June 1, 2016 and concluding on September 30, 2016, upon issuance of a Notice to Proceed. The performance period is inclusive of the time required for the contractor to submit all technical documentation, as well as the time for Forest Service review and subsequent approval of all required technical submissions.

The contract line item (CLIN) is to be treated twice during the contract time frame. The times of treatment are to be done at the times most optimal for control. The foliar herbicides applied can be different for the two treatment times. Please describe a description of when, and with what herbicides, the infestations will be treated in the initial draft Work Plan. Use of ATV/UTV/OHV and other equipment is allowable.

### **Open Land and/or Roadside NNIP –**

Boone Creek Treatment Area: *Sericia lespedeza* (*Lespedeza cuneata*) treatment along a road and throughout a wildlife opening as indicated on the attached map. Work should occur at the appropriate time for optimum effectiveness during Spring and Summer 2016. The use of spot spraying techniques will be necessary to avoid damage to desirable native species. However, broadcast applications can be made in monocultures of lespedeza if no damage is caused to desirable native vegetation. A knowledge of the local flora will be necessary in order to discern between the invasive species and the desirable native plant species.

### **Mobilization**

Mobilization consists of moving personnel, equipment, material, and incidentals to the project and performing all work necessary before beginning work at the project site. Mobilization includes the obtaining of permits, insurance, and bonds. All equipment and trailers shall be cleaned of excessive mud, debris, weeds, grass prior to beginning the project. All mowing equipment shall have sharpened blades prior to beginning any mowing.

(g) Contract award (not applicable to Invitation for Bids). The Government intends to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror's initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) Multiple awards. The Government may accept any item or group of items of an offer, unless the offeror qualifies the offer by specific limitations. Unless otherwise provided in the Schedule, offers may not be submitted for quantities less than those specified. (h) Certification Regarding Responsibility Matters (Executive Order 12689). (Applies only if the contract value is expected to exceed the simplified acquisition threshold.) The offeror certifies, to the best of its knowledge and belief, that the offeror and/or any of its principals-

(1)  Are,  are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2)  Have,  have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3)  Are,  are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h)(2) of this clause; and

(4)  Have,  have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,500 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. §6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. §362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). [The Contracting Officer must list in paragraph (i)(1) any end products being acquired under this solicitation that are included in the List of Products Requiring Contractor Certification as to Forced or Indentured Child Labor, unless excluded at .]

(i) The offeror will not supply any end product listed in paragraph (i)(1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product.

(ii) The offeror may supply an end product listed in paragraph (i)(1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product. The offeror certifies that it has made a good faith effort to determine whether forced or indentured child labor was used to mine, produce, or manufacture any such end product furnished under this contract. On the basis of those efforts, the offeror certifies that it is not aware of any such use of child labor.

For statistical purposes only, the offeror shall indicate whether the place of manufacture of the end products it expects to provide in response to this solicitation is predominantly-

(2)  Outside the United States.

(k) Certificates regarding exemptions from the application of the Service Contract Labor Standards (Certification by the offeror as to its compliance with respect to the contract also constitutes its certification as to compliance by its subcontractor if it subcontracts out the exempt services.) [The contracting officer is to check a box to indicate if paragraph (k)(1) or (k)(2) applies.]

(1) Maintenance, calibration, or repair of certain equipment as described in FAR [22.1003-4\(c\)\(1\)](#). The offeror  does  does not certify that-

#### **52.204-7 System for Award Management. (Jul 2013)**

(a) Definitions. As used in this provision-

“Data Universal Numbering System (DUNS) number” means the 9-digit number assigned by Dun and Bradstreet, Inc. (D&B) to identify unique business entities.

“Data Universal Numbering System +4 (DUNS+4) number” means the DUNS number assigned by D&B plus a 4-character suffix that may be assigned by a business concern. (D&B has no affiliation with this 4-character suffix.) This 4-character suffix may be assigned at the discretion of the business concern to establish additional System for Award Management records for identifying alternative Electronic Funds Transfer (EFT) accounts (see the FAR at [subpart 32.11](#)) for the same concern.

“Registered in the System for Award Management (SAM) database” means that-

(1) The offeror has entered all mandatory information, including the DUNS number or the DUNS+4 number, the Contractor and Government Entity (CAGE) code, as well as data required by the Federal Funding Accountability and Transparency Act of 2006 (see [subpart 4.14](#)) into the SAM database;

(2) The offeror has completed the Core, Assertions, and Representations and Certifications, and Points of Contact sections of the registration in the SAM database;

(3) The Government has validated all mandatory data fields, to include validation of the Taxpayer Identification Number (TIN) with the Internal Revenue Service (IRS). The offeror will be required to provide consent for TIN validation to the Government as a part of the SAM registration process; and

(4) The Government has marked the record “Active”.

(b)(1) By submission of an offer, the offeror acknowledges the requirement that a prospective awardee shall be registered in the SAM database prior to award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation.

(2) The offeror shall enter, in the block with its name and address on the cover page of its offer, the annotation "DUNS" or "DUNS +4" followed by the DUNS or DUNS +4 number that identifies the offeror's name and address exactly as stated in the offer. The DUNS number will be used by the Contracting Officer to verify that the offeror is registered in the SAM database.

(c) If the offeror does not have a DUNS number, it should contact Dun and Bradstreet directly to obtain one.

(1) An offeror may obtain a DUNS number-

(i) Via the Internet at <http://fedgov.dnb.com/webform> or if the offeror does not have internet access, it may call Dun and Bradstreet at 1-866-705-5711 if located within the United States; or

(ii) If located outside the United States, by contacting the local Dun and Bradstreet office. The offeror should indicate that it is an offeror for a U.S. Government contract when contacting the local Dun and Bradstreet office.

(2) The offeror should be prepared to provide the following information:

(i) Company legal business.

(ii) Tradestyle, doing business, or other name by which your entity is commonly recognized.

(iii) Company Physical Street Address, City, State, and ZIP Code.

(iv) Company Mailing Address, City, State and ZIP Code (if separate from physical).

(vi) Date the company was started.

(vii) Number of employees at your location.

(viii) Chief executive officer/key manager.

(ix) Line of business (industry).

(x) Company Headquarters name and address (reporting relationship within your entity).

(d) If the Offeror does not become registered in the SAM database in the time prescribed by the Contracting Officer, the Contracting Officer will proceed to award to the next otherwise successful registered Offeror.

(e) Processing time, which normally takes 48 hours, should be taken into consideration when registering. Offerors who are not registered should consider applying for registration immediately upon receipt of this solicitation.

(f) Offerors may obtain information on registration at <https://www.acquisition.gov>.

AGAR 452.237-74 Key Personnel (FEB 1988)

ALL OCCUPATIONS LISTED ABOVE RECEIVE THE FOLLOWING BENEFITS:

HEALTH & WELFARE: \$4.27 per hour or \$170.80 per week or \$740.13 per month

VACATION: 2 weeks paid vacation after 1 year of service with a contractor or successor, 3 weeks after 8 years, and 4 weeks after 15 years. Length of service includes the whole span of continuous service with the present contractor or successor, wherever employed, and with the predecessor contractors in the performance of similar work at the same Federal facility. (See 29 CFR 4.173)

HOLIDAYS: A minimum of ten paid holidays per year: New Year's Day, Martin Luther King Jr.'s Birthday, Washington's Birthday, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day. (A contractor may substitute for any of the named holidays another day off with pay in accordance with a plan communicated to the employees involved.) (See 29 CFR 4.174)

THE OCCUPATIONS WHICH HAVE NUMBERED FOOTNOTES IN PARENTHESES RECEIVE THE FOLLOWING:

1) COMPUTER EMPLOYEES: Under the SCA at section 8(b), this wage determination does not apply to any employee who individually qualifies as a bona fide executive, administrative, or professional employee as defined in 29 C.F.R. Part 541. Because most Computer System Analysts and Computer Programmers who are compensated at a rate not less than \$27.63 (or on a salary or fee basis at a rate not less than \$455 per week) an hour would likely qualify as exempt computer professionals, (29 C.F.R. 541.400) wage rates may not be listed on this wage determination for all occupations within those job families. In addition, because this wage determination may not list a wage rate for some or all occupations within those job families if the survey data indicates that the prevailing wage rate for the occupation equals or exceeds \$27.63 per hour conformances may be necessary for certain nonexempt employees. For example, if an individual employee is nonexempt but nevertheless performs duties within the scope of one of the Computer Systems Analyst or Computer Programmer occupations for which this wage determination does not specify an SCA wage rate, then the wage rate for that employee must be conformed in accordance with the conformance procedures described in the conformance note included on this wage determination.

Additionally, because job titles vary widely and change quickly in the computer industry, job titles are not determinative of the application of the computer professional exemption. Therefore, the exemption applies only to computer employees who satisfy the compensation requirements and whose primary duty consists of:

(1) The application of systems analysis techniques and procedures, including consulting with users, to determine hardware, software or system functional specifications;

(2) The design, development, documentation, analysis, creation, testing or modification of computer systems or programs, including prototypes, based on and related to user or system design specifications;

(3) The design, documentation, testing, creation or modification of computer programs related to machine operating systems; or

(4) A combination of the aforementioned duties, the performance of which requires the same level of skills. (29 C.F.R. 541.400).

2) AIR TRAFFIC CONTROLLERS AND WEATHER OBSERVERS - NIGHT PAY & SUNDAY PAY: If you work at night as part of a regular tour of duty, you will earn a night differential and receive an additional 10% of basic pay for any hours worked between 6pm and 6am. If you are a full-time employed (40 hours a week) and Sunday is part of your

regularly scheduled workweek, you are paid at your rate of basic pay plus a Sunday premium of 25% of your basic rate for each hour of Sunday work which is not overtime (i.e. occasional work on Sunday outside the normal tour of duty is considered overtime work).

**\*\* HAZARDOUS PAY DIFFERENTIAL \*\***

An 8 percent differential is applicable to employees employed in a position that represents a high degree of hazard when working with or in close proximity to ordnance, explosives, and incendiary materials. This includes work such as screening, blending, dying, mixing, and pressing of sensitive ordnance, explosives, and pyrotechnic compositions such as lead azide, black powder and photoflash powder.

All dry-house activities involving propellants or explosives. Demilitarization, modification, renovation, demolition, and maintenance operations on sensitive ordnance, explosives and incendiary materials. All operations involving re-grading and cleaning of artillery ranges.

A 4 percent differential is applicable to employees employed in a position that represents a low degree of hazard when working with, or in close proximity to ordnance, (or employees possibly adjacent to) explosives and incendiary materials which involves potential injury such as laceration of hands, face, or arms of the employee engaged in the operation, irritation of the skin, minor burns and the like; minimal damage to immediate or adjacent work area or equipment being used. All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**\*\* UNIFORM ALLOWANCE \*\***

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

**\*\* SERVICE CONTRACT ACT DIRECTORY OF OCCUPATIONS \*\***

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations", Fifth Edition (Revision 1), dated September 2015, unless otherwise indicated.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE  
Standard Form 1444 (SF-1444)

**Conformance Process:**

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined (See 29 CFR 4.6(b)(2)(i)). Such conforming procedures shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees (See 29 CFR 4.6(b)(2)(ii)). The Wage and Hour Division shall make a final determination of conformed classification, wage rate, and/or fringe benefits which shall be retroactive to the commencement date of

the contract (See 29 CFR 4.6(b)(2)(iv)(C)(vi)). When multiple wage determinations are included in a contract, a separate SF-1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation(s) and computes a proposed rate(s).
- 2) After contract award, the contractor prepares a written report listing in order the proposed classification title(s), a Federal grade equivalency (FGE) for each proposed classification(s), job description(s), and rationale for proposed wage rate(s), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, U.S. Department of Labor, for review (See 29 CFR 4.6(b)(2)(ii)).
- 4) Within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.
- 5) The contracting officer transmits the Wage and Hour decision to the contractor.
- 6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF-1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to ensure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.
