

HORSEFLY C&H 2016 ANNUAL OPERATING INSTRUCTIONS

Livestock management in 2016 will focus on the following:

- Continue using the GRI.
- Look for potential water development sources.

Range conditions, livestock distribution, compliance with annual operating instructions, forage utilization, etc. may be inspected during the summer field season. Cattle counts may also be conducted at any time as provided for in Part 2, Section 8(f) of your permit.

Monitoring and Administration: All permittees are required to keep Actual Use and Fence Maintenance records. In addition, you are required to utilize the Grazing Response Index for this allotment. An informational instruction sheet is included with this Annual Operating Instruction. If you require training on how to use the Grazing Response Index, please contact your Rangeland Management Specialist Brian Hoefling at 970-327-4261. These records will be requested by the administering office at the end of the grazing season.

For reference the target is a neutral GRI score averaged over three years by pasture where conditions are “Fair” or greater. The target is a positive GRI score averaged over three years by pasture where conditions are “Poor”.

Range Improvements: Maintenance of allotment boundary fences will be completed prior to turning out on the allotment. Maintenance of all other assigned range improvements must be completed prior to turning out in that unit. Maintenance will be completed according to the specifications outlined in part 3 of the term grazing permit. Reconstruction or construction of range improvements will not occur without a signed and approved permit modification, and cultural resource survey, where needed.

Salting: Salt will be placed no closer than 1/4 mile to all water sources, roads, trails, timber regeneration areas, meadows, or other key areas where forage utilization is of concern.

Grazing Fee: \$2.11/HM.

This figure is calculated according to a formula established by Congress in the 1978 Public Rangelands Improvement Act, and has continued under a Presidential Executive Order issued in 1986. Under that order, the grazing fee cannot fall below \$1.35 per head month and any increase or decrease cannot exceed 25 percent of the previous year’s level. The formula considers three main factors – the average annual change in beef prices, leasing rates for the grazing on private land in 11 western states, and the cost of livestock production.

HORSEFLY C&H

2016 ANNUAL OPERATING INSTRUCTIONS

Special Authorizations: ATV and UTV use on the allotment is approved for fence maintenance and to carry salt. However, this authorization does not extend to placement of salt across the allotment. If needed, authorization can be obtained for specific salting locations. An authorization may be issued by the District to allow cutting of timber for a new fence installation along private land. The Terms and Conditions of that authorization are included in this Annual Operating Instruction.

Water Hauling: You are authorized to place a tank in the perimeter of the Logging Camp Pond for use of watering livestock. Placement outside of the pond perimeter will require additional approval and site survey.
