

## ArcMap Instructions

Map layers that are being developed as part of the Carson NF wilderness process are available from ArcGIS Online. You may add any of the layers from the wilderness web-maps to your .mxd in ArcMap.

The Inventory layer (and [documentation for the inclusion/exclusion of each polygon](#)) is available from ArcGIS online. If you are in ArcGIS, and connected to the internet, click the dropdown on the add data button, choose Add Data from ArcGIS Online and search for Carson wilderness inventory (or Carson final wilderness inventory):

You can also view the layer (along with basemaps, and other data) through [ArcGIS Online directly](#) if you don't have a desktop version of ArcMap.
