

Allegheny National Forest

New in 2016 for Timberline ATV Trail

The old trail mile markers -- like the one to the left -- no longer fit with the new technology that maps our trails.

Timberline is now mile-marked like the sign on the right. It tells you what part of the trail you're on and what mile or half-mile you are at.

Intersection signs are marked like the sign on the left. In this example, if you are on the bottom leg of this intersection, you are on the E Loop. Go straight and you stay on the E; turn right and you are heading to Buehler Corners.

We have not done this on the Marienville ATV or bike trails yet. But in the next few years, we will reconstruct the trail system for better surface and drainage and post new signs. Let us know what you think.

Heavy maintenance will occur while trails are open. We are sorry for the inconvenience.

Please keep your headlights on and ride with caution!
