14. Project Location [Sec. 203(b)(1)] (Legal description, road #'s, watershed, land ownership.)

This project is located in Pole Canyon (Forest Road #016), Juab County, and approximately 2.1 miles from the junction of Pole Canyon Road and Nebo Loop Road junction (T12S, R2E, Sections 22 &23).

15. Project Description [Sec. 203(b)(1)] (max 30 lines.)

This project consists of two existing dispersed camping sites that require maintenance in order to reduce erosion, improve water quality, enhance watershed condition and improve access by forest users. These sites are two of only a handful of the dispersed recreation opportunities for public use in the Pole Canyon drainage. The two sites comply with the 150 foot dispersed camping distance from a designated system road. However, access to the sites need to be mitigated with an improved road surface material and placement of two culverts on Pole Canyon Creek.

16. Project Goals and Objectives (what the project will accomplish) [Sec. 203(b)(1)] (max 20 lines)

These actions will reduce erosion into Pole Canyon Creek from the access roads, provide a more suitable crossing over Pole Canyon Creek while maintaining the limited dispersed camping opportunities in Pole Canyon. Forest Service personnel and the Juab County Commissioners and staff visited this site in the fall of 2015 and both agreed that this would be a win-win project for the community who highly value dispersed camping opportunities while protecting watershed values and resources.
