

## Gulch Thin

### TEMPORARY ROAD CONSTRUCTION AND RECONSTRUCTION COSTS

#### **1.19 Miles of temporary roads to be constructed**

@ \$40,000 per mile (includes rocking and culverts where needed, erosion control measures, and winterizing between logging seasons if needed)

$$1.19 \text{ miles} \times \$ 40,000.00 = \$47,600$$

#### **2.49 Miles of temporary roads to be reconstructed**

@ \$25,000 per mile (includes rocking and culverts where needed, erosion control measures, and winterizing between logging seasons if needed)

$$2.49 \text{ miles} \times \$25,000 = \$62,250$$

$$\begin{array}{r} \text{Construction} = \$ 47,600 \\ \text{Reconstruction} = \$ \underline{62,250} \\ \text{Total} = \$ 109,850 \end{array}$$

$$\$109,850 \text{ divided by } 28,560 \text{ CCF} = \underline{\$3.84 \text{ per CCF}}$$
