

Forest Plan Revision PROCESS

Forest Plan implementation and monitoring

Pre-Assessment*

Public Involvement Plan, Science Synthesis, Bio-regional Assessment

Forest Assessment*

Define Forest roles and contributions; identify wild and scenic rivers candidates; construct wilderness inventory, determine potential species of conservation concern

Proposed Plan Development*

Need to Change, wild and scenic rivers analysis, wilderness inventory and evaluation, proposed species of conservation concern lists, desired conditions

Notice of Intent, Proposed Actions, Draft Forest Plan*

Develop Draft Environmental Impact Statement*

wild and scenic rivers analysis, wilderness analysis, monitoring program development, suitability of lands determination

Complete Draft Environmental Impact Statement & Draft Forest Plan*

Public comment review, rewriting and analyzing EIS

Develop Final Environmental Impact Statement & Final Forest Plan

Objections Phase*
Objection/Resolution

Record of Decision & Forest Plan implementation

* Indicates stages in which public input is gathered.
